Corporate Services Announces TrakQuip and RTMS Hands-On Classroom Training Schedule for Remainder of the Year

New class added in response to client's needs

Baton Rouge, LA – July 1, 2009 – Corporate Services LLC, developers of TrakQuip™ and RTMS, the premier equipment and rental software applications, has announced the TrakQuip and RTMS classroom training schedule for the remainder of the year.

Continuing to meet their clients' training needs, Corporate Services is pleased to announce a new class focused on learning basic SQL in order to build meaningful, valuable reports. "We found our clients had a tremendous amount of data, but were not always able to access it in a meaningful format," said Bob Dosser, Corporate Services' vice president. "We developed this class in response to that need and have had great feedback thus far."

In addition to the new course, Corporate Services continues to offer the popular TrakQuip and RTMS Essentials courses, which are each three days and cover a range of topics from set up to advanced functionality. A one-day class, Reporting Dashboard, covers data sources, report design and security. The Reporting Dashboard application is an intuitive report writer used to extract data from either TrakQuip or RTMS to create reports exactly how a client wants to see the information.

Attendees include new hires as well as employees who have been using the system for several years. Each year, Corporate Services' client, Light Tower Rentals sends several people to training. "Corporate Services continues to add functionality. We attend the class annually to learn about the new features that have been incorporated into the software and how they can help us be more effective," said Ski Condry, Light Tower Rentals' quality control manager. "It is also a great opportunity to be face to face with the developers and give input on the product."

Classes are taught at Corporate Services' Baton Rouge facility by a qualified instructor who also has implementation expertise, which provides attendees a well-rounded training experience. Class size is limited to ensure a thorough learning experience. For more information, please visit <http://www.corpservice.com/training.php>
