Iris Data Services Releases Version 2.2 of *Unify™* Document Review
Leading Electronic Discovery Company Announces New Release of Document Review Platform

KANSAS CITY, July 13, 2009 — Iris Data Services, a leading provider of eDiscovery solutions, announced today the release of version 2.2 of the *Unify™* document review platform. In addition to document review, Iris Data Services provides various electronic discovery solutions including tape restoration, computer forensics, and eDiscovery.

"This version of *Unify™* online review continues to add functionality for our clients," said Joseph Ziegler, Iris' Director of Technical Services. "It enhances printing functionality, giving legal teams the ability to batch print locally including the ability to print with redactions and add slip-sheets, separators and footer pages. This version also expands *Unify™'s* search functionality, improving the complex search logic and enhances the ability to ignore superfluous characters and symbols," said Ziegler.

About *Unify™*
Iris' online review tool, *Unify™*, is the fastest review tool in the industry, designed specifically to make document review as efficient, accurate and risk-free as possible. Documents load with unparalleled speed, enabling reviewers to work faster, saving time and money. Grouping by near-duplicates, threads, and other similarities aids speed and consistency by allowing for the review of groups of related documents simultaneously. A simple interface and a host of other features, including global language support, automated privilege logs and state-of-the-art security increase accuracy and reduce risk, making *Unify™* the obvious choice in online review technology.

About Joseph Ziegler
Joseph Ziegler is the Director of Technical Services for Iris Data Services and Managing Partner for Iris Data Services Pty Ltd Australia. He has been developing technology for electronic discovery and litigation support for over six years, and has 15 years of enterprise software development experience. Ziegler holds a Bachelor of Computer Science from Texas A&M University, a Masters of Business Administration from the University of Texas, and is a PhD candidate at the University of Western Australia.
