

Sunrise Technologies is the premier provider of Microsoft Dynamics AX for the apparel and footwear industries. Sunrise Technologies combines industry expertise with specific functionality available in Microsoft Dynamics AX to help apparel and footwear companies meet their unique business requirements.

The Sunrise **Apparel & Footwear Template for Microsoft Dynamics AX** is a Certified for Microsoft Dynamics product, which signifies that the solution has met Microsoft Corporation's highest standard for partner-developed software. The Apparel & Footwear template is an integrated and comprehensive solution for both full-package sourcing and vertical manufacturing companies.

- Certified by Microsoft as a **Certified for Microsoft Dynamics AX** product
- Written in X++ code using the Microsoft Dynamics AX development environment
- Uses existing objects wherever possible, extending them as needed
- Introduces new objects that fully integrate to the existing objects
- Follows **Microsoft Dynamics AX** best practices on user interface, inheritance, etc.
- Offers a comprehensive set of industry specific functions including the following:
 - Color, size, and configuration masters & scales
 - Season codes
 - Item status codes
 - Automated UPC code generation
 - Item attributes
 - Intelligent bill of materials & route management
 - Sales order matrix
 - Purchase order matrix
 - Bill of materials matrix
 - Sales order categories
 - Sales cancellation log with reason codes
 - Sales order hold with hold codes
 - Sales restrictions
 - Customer ship-to and mark-for addresses
 - Master production order

Item dimension scales (color, size, and configuration) can be maintained for various product lines or seasons. This allows you to quickly apply a range of values (color, size, and configuration) to an item (style). Values can be assigned sequence numbers to arrange them on the form in a logical order. For example, sizes will appear as S, M, and L instead of in alphabetical order.

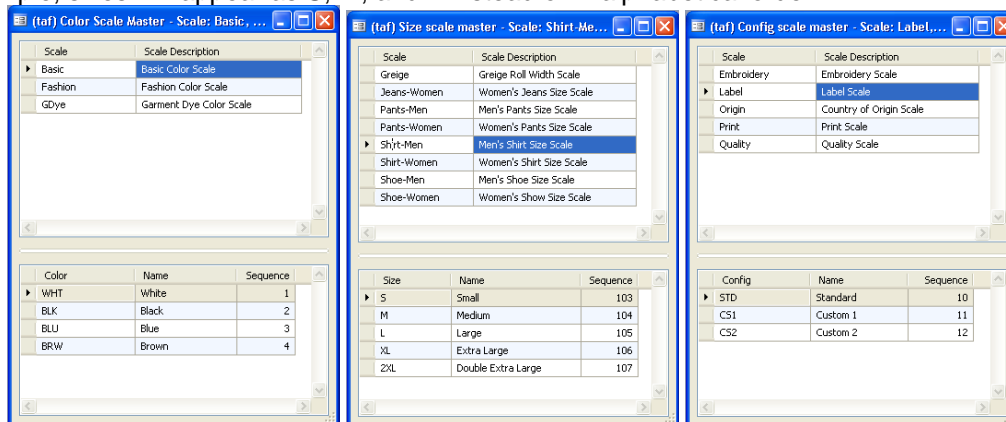

Figure 1: Color, size, and configuration scales

The intuitive sales order matrix allows fast and easy order entry. Invalid item combinations are disabled and indicated by cell shading. The matrix information is automatically carried over to the "Lines" tab for an alternate view of the order lines.

Sunrise Apparel & Footwear Template allows the user to create Master Production Orders (MPO), which allow you to assign multiple production orders to a single overriding master. The key benefit is the ability to assign varying style, color, size to a single production run. When an MPO is updated, all production orders assigned to the MPO are also updated and function as a group.

Figure 3: Shows multiple production orders of varying SKUs assigned to a single MPO
