

Cargo Nets

- ▶ Made from knotless nylon with Dyneema® border rope and extension lanyards at each corner
- ▶ Reinforced center for durability and visibility
- ▶ Polyurethane coated for UV and abrasion resistance
- ▶ Extension lanyard in-house preloading to 1T
- ▶ Minimum 7:1 Safety Factor on all products (excluding hardware)
- ▶ Complies with US Office of Aircraft Services Synthetic Longline Requirements

Since 1978, Barry Cordage Ltd. has been manufacturing and distributing a wide range of industrial-grade, rope related products and services. Barry's fabrication standards meet or exceed strict industry norms and reflect their unique expertise and innovative solutions in textile, deceleration and biomechanics. Onboard Systems is proud to be an authorized Barry distributor and can now provide one-stop shopping for your external cargo hook and cargo net equipment needs.

REGULAR CARGO NETS

Barry's cargo nets are made from knotless nylon with Dyneema® border rope, extension lanyards at each corner and are polyurethane coated to provide additional UV protection and abrasion

resistance. They also have a reinforced center for durability and visibility. The standard size cargo net is 16' x 16', though other sizes are available.

HEAVY DUTY CARGO NETS

Barry's heavy duty cargo nets are handmade of twisted ropes (nylon, polyester or polypropylene) or braided ropes (nylon, polyester or Dyneema®). Rope diameter depends on the working load limit (WLL) required. The standard size cargo net is 16' x 16', though other sizes are available. Squares can range from 6" to 12" or more upon request. Also, a piece of knotless nylon net can be attached to the center of the cargo net to increase durability and to add visibility to the net while lying on the ground.

Crosby™ hardware is used on the lanyard hooks, and a polyurethane coating can be used on every non-polypropylene textile

component of the net for UV protection and abrasion resistance.

THE BARRY ADVANTAGE

Each Barry cargo net comes with an ID tag imprinted with a serial number and a full set of documentation, including a Certificate of Compliance, a logbook and an inspection guideline sheet for easy net management. An optional transport bag with an integrated document pocket is also available.

When you pair an external cargo hook from Onboard Systems with a Barry cargo net, you can be assured of high safety, low weight, and maximum value for your external cargo load work. Please call us today or visit our website for more information about our cargo hook and net options. ❖
