

Scanaroo

Simplify. Save. Share.

Scanaroo helps you use your iPhone to keep track of all your loyalty, insurance, library, membership and other cards.

Simplify Your Life

Scanaroo lets you simply and easily carry all those cards that are cluttering up your life. Just take a picture of the card with your phone's camera, and file it away.

It's like spring cleaning for your bag or wallet.

Save Money

One of the problems with loyalty cards is that you never seem to have them with you when you need them. Scanaroo enables you to carry around all your loyalty cards from grocery, retail and other stores, so you can always get the best deal. No more "oh no" moments at the checkout line when you find that you've left your card at home.

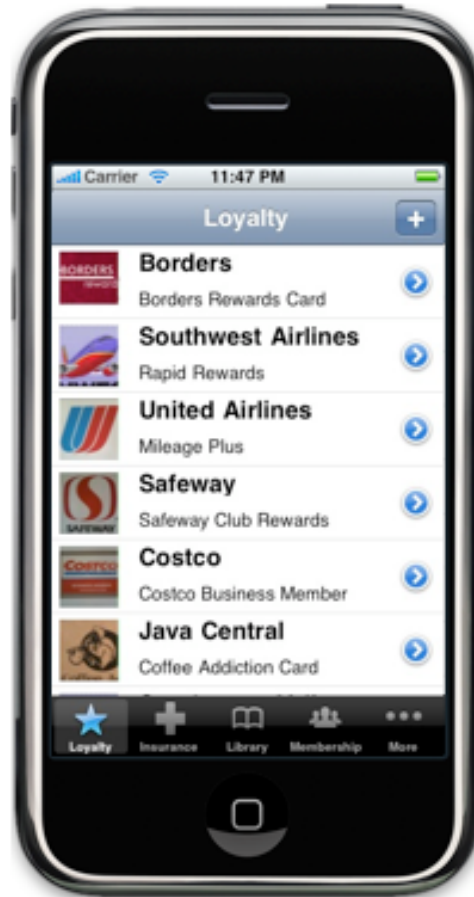

Share the Good

Scanaroo saves you time, since you never need to frantically go digging through your bag or wallet to find your cards. It also saves you money, since you always have your tools for getting the best deals right at your fingertips. More time and more money means more of both can be spent with your family and friends.

Features

Scanaroo is full-featured, and is designed to serve you, not the other way around.
