

# Back pain experts speak...

New treatment got the attention of top medical doctors in the country.

*Top experts publicly share their opinion about this new treatment for low back pain, sciatica, herniated discs and spinal stenosis.*

*"A lot of patients that I see are actually sent for surgery and I give them this alternative and in a great majority of patients this lets them get rid of their pain without having to have surgery."*

**Dr. Robert Hudgins, M.D., Neurosurgeon**

*"I have patients who I would bet would go into surgery after looking at their MRI and after examining them. And they'd come back telling me that after 2 sessions they were better and after the completion of treatments are completely pain free. You can't argue with that kind of success."*

**Dr. Jeffery Shall, M.D., Orthopedic Surgeon**

*"... What we did was we went to 4 clinics in the Midwest and looked at 100 patients to see how the results were after treatment with the DRX 9000™. And what we found was that when patients came into the clinic, they had a score of 6/10 in terms of pain, and after 2 months of treatment their pain on average went down to 1/10. I thought that was very impressive..."*

**Dr. Alex Macario, M.D., Stanford University**

*"At first, I honestly thought this is too good to believe... There's no way that they could actually get this good of results in patients who had severe chronic low back pain for so many years duration... It was impressive... I was really shocked to be able to reproduce the same efficacy that we saw from the previous retrospective analysis..."*

**Dr. John Leslie, M.D., Mayo Clinic**

*"... the DRX 9000™ has the potential of changing our whole concept of how we treat patients suffering from chronic lower back pain throughout the world..."*

**Dr. Christian Apfel, M.D., University of California at San Francisco**

*"Patients actually did report improvements of pain... They also reported that they had increased functionality. And there were no reports of serious adverse effects... I think it's very exciting to be able to have a new type of therapy that we can offer our patients that may actually revolutionize how we treat chronic low back pain from this point on..."*

**Dr. Joseph Pergolizzi, M.D., Johns Hopkins University**

Dr. John Falkenroth, D.C. who has treated over 2,000 patients with sciatica, herniated discs and low back pain for over 10 years has brought this new treatment to Santa Cruz County. For a FREE DVD on this treatment, call 1-800-803-5805. After a brief recorded message, simply leave your name and mailing address. Shipping is free. Offer good while supplies last.
