

Local doctor brings to Santa Cruz County a new non-surgical treatment for sciatica, herniated discs, low back pain and spinal stenosis...

This breakthrough treatment is endorsed by back surgeons and by doctors from Mayo Clinic, Johns Hopkins University and Stanford University.

I magine feeling good. You have your freedom back. And all it took was an open mind to a new treatment. Simple, easy treatments done while you took a nap. NO surgery, NO medications and NO injections. Too good to be true? Maybe not.

A high-tech treatment for sciatica, herniated discs, bulging discs, low back pain and spinal stenosis is now available in Santa Cruz County. This new treatment is called the DRX 9000™ and Dr. John Falkenroth, D.C. has brought the DRX

DRX 9000™. *And I've seen players in their thirties who are perfectly healthy using the DRX 9000™ to stay perfectly healthy."*

As to his life changing success story using the DRX 9000™ Nobile says, *"For me, the DRX 9000™, I can't put a value on it. All the things that I thought I've forgotten, I can do most of them again now..."*

DOCTORS AND SURGEONS.

When two top medical journals *Anesthesiology News* and *Pain Medicine News* published the positive results from a research study

nap during their treatment.

THE FLAW.

Unfortunately, a small percentage of patients do not respond or only get mild improvement with the DRX 9000™. Patients who are not responding will feel no difference in their back pain level and stiffness. For those who are helped, the results are close to miraculous.

Also, not everyone with back pain, sciatica, herniated discs or spinal stenosis qualifies for treatment on the DRX 9000™. For example, patients whose condition has gotten worse to the point

HEATED HYDROMASSAGE.

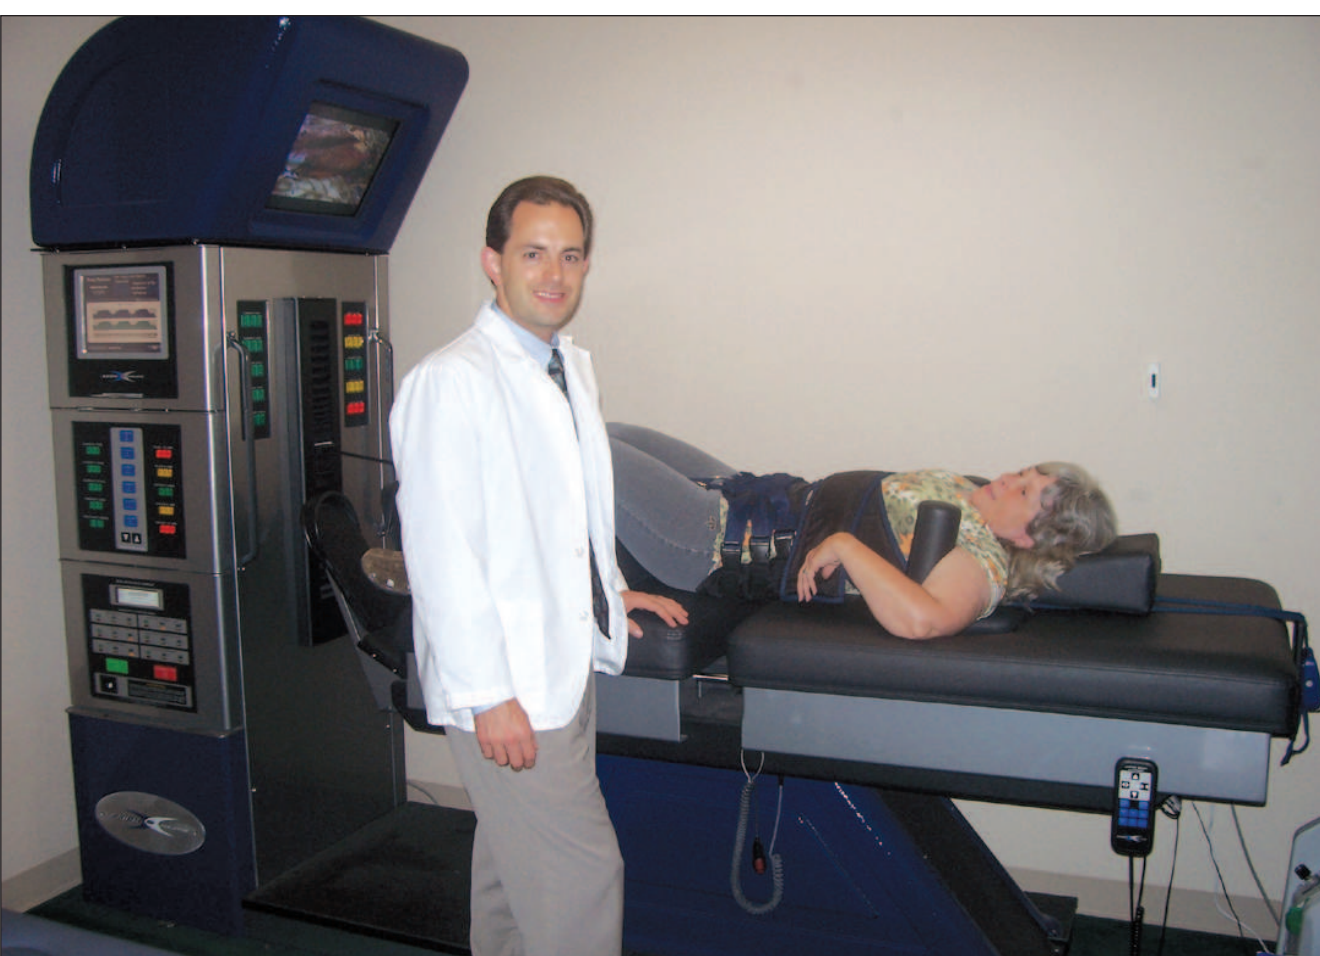

Dr. Falkenroth's patients also enjoy the Aqua PT™ Heated Dry Hydromassage. This therapy is so *RELAXING* and so popular that patients refer their friends and family just to experience this therapy. During this therapy, 30 warm water jets massage the patients back and legs while the patient remains fully clothed and dry. This therapy decreases pain, relaxes muscle spasms and decreases stress.

As if his patients are not pampered enough, Dr.

Back pain experts speak...

Top experts publicly share their opinion about this new treatment for low back pain, sciatica, bulging discs, herniated discs and spinal stenosis.

This new treatment now available in Santa Cruz County may help people suffering with sciatica, herniated discs, bulging discs, low back pain and spinal stenosis get relief from their pain without having to have invasive back surgery.

9000™ to our area. According to Dr. Falkenroth, *"In my 10 years of treating patients with back pain, sciatica, herniated discs and stenosis, I have not seen anything like the DRX 9000™. Some patients who can barely walk are able to stand up straight and walk normal again after just a few sessions on the DRX 9000™."*

AMAZING RESULTS.

The DRX 9000™ is quickly becoming very popular - both among patients and doctors. And for good reasons. The treatment is very easy on the patient...and the results are impressing doctors and researchers. Dr. Falkenroth also mentioned that this new treatment enables many of his patients to quickly cut their dependency on pain medications. Many patients are reporting excellent results.

DRX 9000™ patient and golf analyst Frank Nobile says, *"I've seen players getting ready for the Champions Tour and nearing 50 years of age trying to get back in shape for example using the*

done on the DRX 9000™, this new treatment got the attention of top medical doctors in the country. Dr. John Leslie, M.D. of Mayo Clinic said, *"...It was impressive..."*

The remarkable results of the research study done by well-respected medical researchers have been presented in packed medical conferences in major cities all around the world including San Diego (United States), Genoa (Italy), Athens (Greece), and Hamilton Island (Australia). Even some back surgeons now recommend that their patients first try the DRX 9000™ before they undergo invasive back surgery.

IS IT SAFE?

The DRX 9000™ is safe. Unlike back surgery, there is no risk of infection. There is no time off from work required. Also, the patient does not have to go through extensive post-surgical recovery and physical rehabilitation.

Treatments with the DRX 9000™ are also very comfortable. In fact, the treatments are so relaxing that most patients take a short

where they are now having problem with bladder control or problem with bowel control no longer qualify for treatment on the DRX 9000™.

According to Dr. Falkenroth, *"Unfortunately, these patients do not have much option besides back surgery."*

ANOTHER NEW TREATMENT.

Another high-tech treatment Dr. Falkenroth uses is the Pro-Adjuster™. This computerized way to treat the back and the neck has gotten very popular with back pain and neck pain sufferers. So popular that the manufacturer of the Pro-Adjuster™ had to hire a full-time employee just to handle the phone calls from patients across the United States looking for a doctor in their area who uses the Pro-Adjuster™.

With this computer-guided treatment, the patient sits comfortably on a specially-designed treatment chair. The Pro-Adjuster™ is great for pregnant women and other patients with back pain and neck pain who are looking for a gentler yet effective way to treat their spine.

Falkenroth also spoils his patients with electronic massage chairs and tasty treats. Dr. Falkenroth's patients are also big fans of the liquid glucosamine joint supplement that his office carries.

Dr. Falkenroth's commitment to deliver outstanding service to his patients has earned him the loyalty of his patients. In fact, some patients drive 6-8 hours one way to get treated by Dr. Falkenroth. Dr. Falkenroth says, *"My patients regard me as their trusted back pain expert. I see myself as their advocate in bringing them the latest treatments that might benefit them."*

Dr. John Falkenroth, D.C. has been in practice locally for over 10 years. He has treated over 2,000 patients with back pain, neck pain, herniated discs, bulging discs, sciatica and spinal stenosis. More information about these advanced non-surgical treatments can be found at Dr. Falkenroth's clinic website www.repairmyback.com. His office can be reached directly at (831) 475-8600.

"A lot of patients that I see are actually sent for surgery and I give them this alternative and in a great majority of patients this lets them get rid of their pain without having to have surgery."

Dr. Robert Hudgins, M.D., Neurosurgeon

"I have patients who I would bet would go into surgery after looking at their MRI and after examining them. And they'd come back telling me that after 2 sessions they were better and after the completion of treatments are completely pain free. You can't argue with that kind of success."

Dr. Jeffery Shall, M.D., Orthopedic Surgeon

"... What we did was we went to 4 clinics in the Midwest and looked at 100 patients to see how the results were after treatment with the DRX 9000™. And what we found was that when patients came into the clinic, they had a score of 6/10 in terms of pain, and after 2 months of treatment their pain on average went down to 1/10. I thought that was very impressive..."

Dr. Alex Macario, M.D., Stanford University

"At first, I honestly thought this is too good to believe... There's no way that they could actually get this good of results in patients who had severe chronic low back pain for so many years duration... It was impressive... I was really shocked to be able to reproduce the same efficacy that we saw from the previous retrospective analysis..."

Dr. John Leslie, M.D., Mayo Clinic

"... the DRX 9000™ has the potential of changing our whole concept of how we treat patients suffering from chronic lower back pain throughout the world..."

Dr. Christian Apfel, M.D., University of California at San Francisco

"Patients actually did report improvements of pain... They also reported that they had increased functionality. And there were no reports of serious adverse effects... I think it's very exciting to be able to have a new type of therapy that we can offer our patients that may actually revolutionize how we treat chronic low back pain from this point on..."

Dr. Joseph Pergolizzi, M.D., Johns Hopkins University

"This treatment has allowed many of my patients to not only avoid back surgery but to also go back to their normal active lifestyle. Some patients have been able to go back to their physically demanding jobs such as construction or nursing within 2 weeks after being off work due to debilitating back pain."

Dr. John Falkenroth, D.C., Soquel, California
