

THE
BEDDER WAY CO.®
Handcrafted Murphy Beds

THANK YOU FOR YOUR INTEREST!

We would like to thank you for your interest in our line of Murphy beds and matching accents. These extremely attractive pieces provide a perfect solution for your space-saving needs. Our Murphy beds and accents are hand constructed from oak or maple wood (both hardwoods and furniture-grade plywoods) and each bed is given personal attention and detail, ensuring top-quality craftsmanship.

In this brochure, you will find all of the information on face style choices, stain colors, hardware options, and additional upgrades. You will also find information on operation, product dimensions, delivery options, and other technical data. Please feel free to contact us for current production timelines or any other information you may need.

REAL WOOD. THE REAL DIFFERENCE.

Real oak or maple wood construction makes our Murphy beds not only a space-saving solution, but a beautiful fine furniture addition to your home as well. Though many other companies are building Murphy beds with inferior materials, they are still charging a premium price. There are **no particle boards or melamines** used in the construction of our beds. See the table below to compare our beds to the competition.

THE NEW GENERATION OF MURPHY BEDS.

We understand that every space is different. With our unique combination of sizes, orientations, designs, and options, we're sure that we have the right fit for you. We have perfected the Murphy bed concept with improved, more reliable features. All of our pieces are hand constructed for maximum durability. Our beds are crafted for a maximum weight capacity of 2,500 lbs., complete with a state-of-the-art piston mechanism rated for 10,000 revolutions: equivalent to 27 years of daily use. Each bed comes with a 10-year guarantee on all mechanical parts, giving you lasting peace of mind.

Spice stain color on oak

OUR REAL WOOD BEDS

Furniture grade hardwood plywood

Solid hardwood moldings

Standard crown molding

Accommodate a standard mattress

Largely assembled, easy to install

Dependable, safe, & strong piston

INSIDE delivery is standard

Simply secured to wall, moveable

THE COMPETITION'S BEDS

Particle board or melamine (plastic)

Not available on standard models

Optional crown molding (extra cost)

May require a special mattress

Completely broken down, difficult

Bulky & complicated spring

CURBSIDE delivery is their standard

Most bolt permanently to floor

INSTALLATION IS EASY, TOO!

On average, complete installation of your new Murphy bed should take two people only one hour to complete. Each bed comes with easy-to-follow, step-by-step instructions and the best part is, our beds DO NOT require floor mounting. Installation is complete when your bed is securely fastened to the wall (studs, concrete, block, etc.). This means it will be easy to move as your design needs change.

Each bed has a built-in mattress support box frame, so a conventional box spring is not necessary. Our standard designs make finding the perfect innerspring, memory-foam or latex mattress for your new Murphy bed a breeze. Standard units comfortably accommodate mattresses up to 12 inches thick. If your mattress is thicker than 12 inches, please ask about our extra-depth option. Please note, memory-foam and latex mattresses are heavier than standard innerspring mattresses. The mechanism is unaffected by this extra weight, but you will notice a difference when raising and lowering the bed.

WOOD – STAIN COLORS & FINISHES

We realize that every individual's needs are different based on decorating preferences and pre-existing room colors. Our 10-step finishing process ensures your wall bed a beautiful and durable finish. Below are your options for choosing the wood and stain color that best complements your decor. Keep in mind, colors may vary slightly from what is shown below.

WANT TO FINISH YOUR MURPHY BED YOURSELF?

If you prefer to finish your project yourself, you can order all of the pieces unfinished. We will construct the bed using the same materials and methods as with all of our products. Once you receive the pieces, you can prep and finish them any way you like.

DISCOUNT FOR AN UNFINISHED BED: \$100

DISCOUNT FOR AN UNFINISHED SIDE CABINET: \$75 each

HARDWARE OPTIONS

Below are the standard hardware options available for use on our vertical and horizontal wall beds and side cabinets. Keep in mind, not every hardware option is available for every face style of bed. Each face style has a style of hardware, specifically chosen to accentuate the design of the bed.

VERTICAL DESIGNS

If your room has ample ceiling height and adequate floor space, the vertical wall bed is your best option. This is the most popular orientation because it sleeps exactly the same as a typical bed. With a variety of face designs and stain colors to choose from, your fully functioning, space-saving bed becomes a beautifully hidden secret, contained in handcrafted, real wood fine furniture. Available in twin, full*, and queen sizes.

VERTICAL WALL BED DIMENSIONS				
SIZE	HEIGHT	WIDTH	DEPTH	PROJECTION
Twin	83¾"	44½"	18"	82¾"
Full	83¾"	59½"	18"	82¾"
Queen	88¾"	65½"	18"	86¾"

IMPORTANT INFORMATION ABOUT DIMENSIONS:

Depth is the dimension from the wall to the face of the bed in the closed position.

Projection is the dimension from the wall to the outside of the bed frame in the open position.

Width given is from outside of crown molding to outside of Crown Molding. If you are trying to fit the bed into a niche, you can subtract 1½" from your width by removing the crown molding. Please contact us for more detailed information and helpful pointers.

ARMOIRE FACE—V103

Impress your visitors with the appearance of a fully functioning armoire. Every detail, down to the hardware, is carefully considered to ensure that this design is an impressive addition to virtually any room in your home. Only you will know that this armoire opens to reveal a comfortable bed for sleeping two adults.

	OAK	MAPLE

HORIZONTAL DESIGNS

If your room has lower ceilings or if the space in front of the bed will be limited, perhaps our horizontal design is the best solution. Although they are wider than our vertical designs, these beds tend to help in areas restricted by limited footprint or ceiling height concerns. Once opened, our horizontal beds give you the comfort you need for a good night's sleep. The added functionality of an eye-level shelf is yet another bonus of our horizontal designs. Horizontal wall beds are available in twin, full*, and queen sizes.

HORIZONTAL WALL BED DIMENSIONS

SIZE	HEIGHT	WIDTH	DEPTH	PROJECTION
Twin	48½"	79"	17½"	46¼"
Full*	63½"	79"	17½"	61¼"
Queen	69½"	84"	17½"	67¼"

IMPORTANT INFORMATION ABOUT DIMENSIONS:

Depth is the dimension from the wall to the face of the bed in the closed position.

Projection is the dimension from the wall to the outside of the bed frame in the open position.

Width given is from outside to outside at the widest point. If you are trying to fit the bed into a niche, you should add ¼ inch to the overall dimension to ensure it will fit. Please contact us for more detailed information and helpful pointers.

*Also commonly referred to as double size.

RAISED PANEL FACE—H109

Add beauty to your room with our solid wood, traditional, raised panel face wall bed. This standard raised panel face gives you the appearance of four sets of raised panel doors with our livello hardware.

MURPHY BED OPTIONS PAINTED FINISH

When a painted finish is preferred, we will prime and paint your wall bed and/or side cabinets. We start off by constructing the pieces with the same materials and methods as all of our other pieces. Two coats of a vinyl primer are then applied to seal the wood and prep the surface for the finish coats.

Then, a thick coat of pigmented lacquer is applied. Pigmented lacquer is simply a paint pigment and lacquer combined to give the pieces a furniture-grade finish with the solid color of paint. We offer both white and black paint, and both are available on all of our products.

- PAINTED BED: Add \$350 to any bed
- PAINTED SIDE CABINETS: Add \$150 to each
- PRIMED BED – READY TO PAINT: Add \$150 to any bed
- PRIMED SIDE CABINETS – READY TO PAINT: Add \$75 each

ADD LIGHTING TO YOUR WALL BED

Two lights will be installed in the header (inside top) of the wall bed. A touch switch, located on the headboard, makes selecting from three levels of brightness convenient. A safety cutoff ensures that the lights will be turned off every time the bed is closed. This kit plugs into a standard outlet.

COMPLETE LIGHT KIT: \$175 (vertical beds only)

LARGER CROWN MOLDING

If you prefer, a larger, more lavish crown molding can be added to your bed and cabinets. This crown molding is a very popular addition and takes the place of our standard crown molding. Please note that this crown molding adds 2 inches to the height, 4 inches to the width, and 2 inches to the depth of all beds and side cabinets. (Please refer to specific product dimension tables)

- LARGER CROWN – BED: Add \$50
- LARGER CROWN – SIDE CABINET: Add \$25

SIDE CABINETS FOR YOUR WALL BED

BEAUTIFUL, REAL WOOD SIDE CABINETS

You have the option of adding REAL WOOD side cabinetry to your wall bed. These side cabinets are designed to ensure that each perfectly matches your wall bed material and finish. Choose from 7 different styles that range with different combinations including doors, open shelves, or drawers. We offer three standard-width side cabinets — 18, 24, or 30 inches (these dimensions are from outside to outside).

Custom widths are available up to 36 inches for an additional cost. For everything from the alarm clock to bed-side reading and storage for bedding or clothing, we have provided options to complement your wall bed.

Shown here with our Natural stain color on oak

Shown here with our Natural stain color on maple

SIDE CABINET OPTIONS

1. CLOTHES VALET
Hang shirts, pants, jackets or anything else that you want out of the way using this unique option. Not available in 18-inch cabinets or horizontal side cabinets.

ADD \$50 EACH

2. NIGHT STAND
Located at night stand height, this convenient option is perfect for books, glasses, an alarm clock or a drink.

ADD \$75 EACH

3. GLASS SHELVES
Add a distinctive look to your side cabinet by choosing glass shelves. Glass shelves are a beautiful way to display your treasures.

ADD \$75 / CABINET

4. LIGHTING
When combined with glass shelves, a side cabinet light turns your side cabinet into a unique show piece. The light plugs into a standard outlet.

ADD \$90 / CABINET

HOME OFFICE WORKSTATIONS

Unparalleled functionality, uncompromising quality. This is how we describe our workstations. By combining our space-saving wall beds with matching, totally modular cabinetry, you can configure your space to meet your needs. Creating an efficient and beautiful home office or computer room is effortless. Our workstations offer your guests a comfortable place to stay without sacrificing your home office or computer room.

Our workstation cabinets, like all of our products, are constructed of only the finest furniture-grade, hardwood plywoods and solid wood moldings. Please note, each customized workstation will be unique. The number, size, and type of cabinets will determine the number of packages shipped to you. Therefore, shipping charges for custom workstations will be quoted on a per-project basis. We will do our very best to consolidate packaging to keep the shipping cost as low as possible.

With a wide variety of sizes and styles, workstations can be configured to your exact needs. Our base cabinets offer the convenience of lower storage and optional file cabinet organization. Wall cabinets offer overhead storage and can be configured with or without doors. With the addition of a bookcase or a hutch, your space will fit your every need. Top your workstation off with one of our beautiful wood or practical laminate desktops. You can even add a slide-out keyboard shelf to keep your desktop tidy. Add the finishing touch to your project with finely finished crown and base moldings.

We can help you create a custom workstation! Utilizing the latest in cabinet design software, we are able to provide 3-D renderings of your design to ensure your workstation is exactly as you envision it. Please call us to get started!

For simplified ordering, we also offer the following standard configurations to meet your needs. You choose the bed style and size and we'll do the rest. The price for each option includes the Murphy bed shown, all cabinets, desktop, and shipping.

RECEIVING YOUR NEW BED

OUR STANDARD DELIVERY SERVICE is considered an upgraded service for our competitors — and it costs less!

We strive to ensure your delivery is a positive and stress-free experience. No matter your location, each delivery is made by a professionally trained and experienced two-man delivery team. Because each item is built to order and completely unique, there will be a slight lead time for production. Once the order is complete, you will be notified of the shipping and tracking information. Once it leaves our dock, delivery time should not exceed 7 days. Deliveries are made with a pre-set appointment between the hours of 8 a.m. and 5 p.m., Monday through Friday.

STANDARD INSIDE DELIVERY

First Dry Interior Location (\$299): The delivery team will unload your items and carry them inside, placing them in the first dry interior area available, usually in the garage or front entry. The delivery team does not unpack, assemble, or remove the debris. (Side cabinet delivery fee = \$75 each)

WHITE-GLOVE SERVICE

Unpack, Inspect, and Debris Removal (\$359): The delivery team will unload your items and place them in the room of your choice. This includes unpacking your items, inspecting the items, carrying the items up or down a maximum of two flights of stairs, and removal and disposal of the packing material/debris. Because our beds must be attached to the wall, installation is not included. (White-glove side cabinet delivery fee = \$85 each)

IMPORTANT

Although our beds do ship partially unassembled, it is important that they can be delivered through all entryways, hallways, elevator doors and interiors, and/or stairways. If items do not fit upon delivery, cancellation and return fees will apply. Some situations may constitute extraordinary delivery requirements and necessitate additional delivery fees, such as additional stairs over two flights, the use of non-standard delivery equipment, or short term storage. Use the specific bed/cabinet dimensions (provided below) to determine whether the pieces can go straight through and into the space or

ITEM	H	D	L	DIAG
QUEEN BED FACE	63"	9"	83"	64"
DOUBLE BED FACE	57"	9"	78"	58"
TWIN BED FACE	42"	9"	78"	43"
SIDE CABINET	30"	20"	84"	36"
PART BOX (ALL BEDS)	12"	10"	92"	93"

if they must be brought in on end or at an angle. Please make sure that there is a clear and unobstructed path in front of and beyond each doorway. Make sure to consider any fixtures, low ceiling heights, decorative moldings, banisters/handrails, etc., that may make it difficult for delivery. Also, any concealed damage must be reported within 24 hours of your receipt of the items. We work hard to satisfy you. Please call us if you have any concerns and we will be glad to help. Note: We reserve the right to change or update information in this catalog at any time (including after you have submitted your order).

HOW OUR BEDS OPERATE

To understand how our beds operate, there are a couple of things to keep in mind. First, the entire face of the bed is a false façade and comes down as one piece. There are no bulky, bi-fold doors to open and block the side of the bed. Remember, none of the doors or drawers on the bed operate; they are there to decorate the furniture. Second, the outer legs of the bed are cleverly hidden within the cabinetry. The outer legs flip over and lock in place when pulling down the bed face. Below is the procedure for opening the bed.

1. Grab the decorative hardware closest to the top of the bed face and firmly pull (*Figure 1*).
2. In the first few inches, you will feel the tension of the piston lift mechanism. This tension is what prevents the bed from opening on its own.
3. Once the bed is approximately one-quarter of the way open and with your hand to the outside of the bed face, grab the bar that connects the two flip-over legs and pull it in an outward and downward direction (*Figure 2*).
4. Rotate the flip-over leg until it snaps into place at a 90° angle with the footboard.
5. Let the bed continue to come down until it reaches the floor (*Figure 3*). If you have a heavy mattress, you will feel extra weight, so be sure to control it as it comes down.
6. To close the bed, simply work steps 1 – 5 in reverse. Remember to flip the leg over and push it all of the way in before you attempt to close the bed fully.
