Report Overview

The mid-year 2009 Boliven IP Top 25 Report offers scientists and inventors; technology entrepreneurs, executives, marketers and investors; and trademark, patent and licensing professionals a quick summary of the most important inventors, companies, patents, trademark and technology areas appearing in U.S. patents and trademarks granted during the first half of 2009 (January 1, 2009 through June 30, 2009). Compiled with Boliven's easy-to-use search and analytics tools, the report provides a snapshot of some of the most innovative people and institutions in the United States during the beginning of 2009. This report may be copied in whole or in part with attribution.

Our Methodology

The Boliven IP Top 25 Report was compiled in less than one day with Boliven's easy-to-use patent search and analytics technologies. After employing the same tools our members use to develop the initial lists, Boliven team members took care to de-duplicate entries to arrive at more accurate listings. Our listings may differ slightly from those compiled by other database or information service providers that use slightly different de-duplication methodologies. If you discover errors or omissions in this report, please send us an email to service@boliven.com. We would be happy to correct them.
