FOR IMMEDIATE RELEASE

CMather.com Announces Affordable International Web Hosting Plans

Melbourne, VIC (August 31) – CMather.com, one of Melbourne Australia's premiere Web hosting firms, is pleased to announce that it has extended its Web hosting services to customers outside of Australia. CMather.com has built a reputation of providing high-quality, affordable Web services, including Web hosting, Web design and domain name management services.

"We're very pleased to expand our Web-hosting services internationally," says Chris Mather, Group Operations Manager for CMather.com. "Reliable Web hosting is a requirement in today's competitive business environment. The Web enables businesses to operate around the clock, which means that downtime is the ultimate disaster."

CMather.com offers its clients robust hosted Web server solutions on hardware that never exceeds 25% capacity. "Some Web hosting companies try to put as many clients on a Web server as possible. That approach may provide low-cost Web hosting, but it also ensures that each hosted site will receive degraded service and also deliver slow responses to waiting customers," says Mather. "At CMather.com, we add infrastructure as needed to deliver the best possible service to each client we serve."

Mather points out that this attention to detail allows CMather.com to offer a 99.9% uptime guarantee. The hosting servers at CMather.com are connected to a fibre-optic OC3 backbone that delivers a data transfer rate of up to 250 Mb/s. "The bandwidth out of the data centre is just as important as the capacity of the hosting servers. We monitor every area in which a bottleneck can potentially occur and eliminate potential problems before they affect our clients."

CMather.com offers up to 50 GB of Web hosting space, completely customisable to the hosting needs of the customer; data transfer plans of between 15GB and 900 GB; up to 2,500 unique email addresses per domain; unlimited email forwarding; SSL, CGI-BIN, MySQL and PHP support; free blogs, shopping carts and forums; free setup, free dynamic content and free pre-installed scripts; and outstanding live customer support available 24/7, all at an extremely affordable annual rate.

About
