

Microsoft Certified Partner Business Solutions

Run your business more effectively. Quickly and accurately execute time-consuming financial and business management processes. Keep the focus on efficient operations that boost profitability, rather than on entering data and chasing down information.

Integrate key business processes. Gain control over all your operations with seamlessly integrated application that reach across your entire business—including financials, supply chain management, manufacturing, human resources, and project management.

Work with familiar MS Office like interface. Microsoft Dynamics GP captures the look and feel of Microsoft Office Outlook 2003, and offers list-based navigation and streamlined menus for a clean, intuitive interface tailored to your employee's specific roles.

Work "Better together" with Microsoft Office. Rich integration with Microsoft Office Excel, Word, Outlook, MapPoint and Windows SharePoint Services let your organization take advantage of existing skills and technologies to strengthen reporting capabilities, build template-based communications, and foster teamwork and collaboration.

Commitment to Quality. Microsoft Dynamics GP delivers a firm commitment to quality, support, innovation and growth. You can rest assured that your investment will be recognized and rewarded with a solution that continues to add value as your business changes and grows.

Extend the reach of your organization with one solution that gives you the power to manage your business the way you want. Microsoft Dynamics GP offers a modular design that lets you license only the functionality you need, then add modules that integrate instantly with your current solution as your needs change. From core business processes to Web-based delivery of applications, you have the assurance that operations and information are flowing smoothly across your organization—always current, always accurate.

Microsoft Business Solutions

The Financial System that grows alongside your business

Microsoft Dynamics GP Version 9.0 Overview

Financial Management that Brings It All Together

The backbone of your business, Microsoft Dynamics GP Financials sharply reduce time and effort for key accounting tasks, provide easy access and rich analysis of integrated, updated information, and connect smoothly with operations across your entire business.

Manage your financials in the way that best suits your business with unlimited budget tracking, flexible period or month end closing processes, definable multi-currency management - that's just the start. Expansive capabilities embrace all the financial activity that moves through your business - from General Ledger to Inter-company postings, purchasing to project management, expense management to electronic banking.

Count on one version of the truth at all times. Whether you're drilling down for details on invoices or purchase orders, evaluating revenues from your e-commerce site, managing payroll, or processing multi-currency transactions, you'll have the power of automatic information updates and seamless integration across your Dynamics GP solution. A broad range of reporting and business intelligence tools provide the deep visibility into accurate, current information that's key to effective decision making - ranging from at-a-glance views for key performance indicators to cross-company reports from Microsoft FRx.

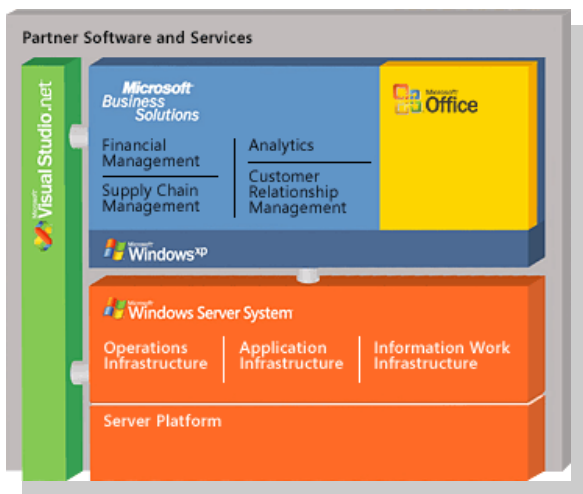

Automate financial processes to work in concert with your entire business solution to unleash efficiency, reduce costs, and improve accuracy. Your inventory will be put to the most strategic use and replenished efficiently. Accountants know who's paying on time and who's in arrears. Banking tasks incorporate transactions from across all areas of your business. Project costs and materials synchronize smoothly with accounting and purchase processes.

Microsoft Business Solutions are integrated business applications for small and mid-size organizations, and divisions of large enterprises. The products and services are delivered through a worldwide network of channel partners.

Microsoft Business Solutions include applications and services for retailers, manufacturers, wholesale distributors, and service companies, doing business domestically or in multiple countries.

Microsoft Business Solutions bring together information from every corner of your company and let you analyze it to make more profitable decisions. As part of the Microsoft family of offerings, these solutions are ready to work with widely-used productivity applications, like Microsoft Office, and top technologies like Microsoft Windows Server System and Microsoft .NET.

Data entered in one place is shared across your company—speeding operations, reducing errors, and putting accurate information at the fingertips of those who need it. But "connected" doesn't stop there. Processes can be securely extended to your entire business community, helping you maximize efficiency.
