

# INTEKRAS CAPABILITIES OVERVIEW

## To Our Partners and Customers

Darrell Green  
Chairman

When I came to this city over 26 years ago to play football for the Washington Redskins, I had no idea what the future held for me.

Though many people have contributed to my success and longevity, nothing has played a more important role than walking in character and integrity. A very wise man once said, "A good name is rather to be chosen than great riches."

The work ethic and level of excellence that I displayed on the playing field have been transferred to my business life as well. As Chairman and founding member, my commitment is to "keep you covered" with innovative and effective solutions while maintaining the values that have always accompanied my success.

## CORE SERVICES

Intekras is a progressive and emerging professional services company offering core solutions in Information Assurance, Technical Services and Workforce Development - serving federal, state and local governments as well as commercial entities.

### Information Assurance

Intekras' Information Assurance Services division offers a broad suite of solutions designed to protect your most critical information assets. ## SAMPLE CLIENT LIST & PAST PERFORMANCE

DoD CLIENTS	DESCRIPTION OF WORK	CIVILIAN CLIENTS	DESCRIPTION OF WORK
	<b>Defense Information Systems Agency</b> — Through a subcontract to Oberon, Inc., providing critical program and administrative support to the Customer Service Division Chief.		<b>Peace Corps</b> — Conducted immediate security/risk assessments and post trend analyses on their worldwide infrastructure and currently providing ongoing incident response oversight and support.
	<b>Department of the Air Force</b> — Under contract to Raytheon IIS, provided program engineering and system design support for the Air Force Global Hawk Mission Control Element (MCE) modifications.		<b>Department of Housing &amp; Urban Development</b> — Working with the Office of the Chief Information Officer (OCIO) to provide HSPD-12 Certification and Accreditation of Agency's Personnel Identification Verification (PIV) system.
	<b>Department of the Navy</b> — Providing system and software engineering technical support and subject matter expertise for the procurement support systems under DOD's SPS PD2 standard procurement initiative with the Indian Head Division/Naval Surface Warfare Center (NSWC) at Indian Head, Maryland.		<b>Health &amp; Human Services</b> — Provide enterprise wide Learning Management System (LMS) for all operational divisions to support training and development for 70,000 employees as well as an additional 1.2 million contractors.
	<b>Department of the Army</b> — Provided support to the Surface Deployment & Distribution Command (SDDC) in the areas of customer requirements definition and refining, system planning, code creation, implementation, plan development, application testing.		<b>Department of Housing &amp; Urban Development</b> — Providing a strategic solution that will enable the Office of the Chief Information Officer (OCIO) to close skill gaps for three selected mission critical IT activities: IT Project Management, IT Architecture and IT Security.
	<b>Department of the Navy</b> — Performing e-Document conversion, print-on-demand, desktop publishing, proofing and associated publication distribution under contract with the Navy Warfare Development Command (NWDC) and the Naval War College (NWC).		<b>Health &amp; Human Services</b> — Providing training and development services for the Center for Medicaid and Medicare Services (CMS) as well as handling the print fulfillment requirements of the Medicare Learning Network (MedLearn) Program.
	<b>Department of the Navy</b> — Providing expert system level support for the computers and systems in the Naval Explosive Ordnance Disposal Technology Division (NAVEOTECHDIV) of the Underwater Warheads Analysis Facility (UWAF) in Indian Head, Maryland.		<b>U.S. Department of Agriculture</b> — Facilitated the development of performance standards for key positions in mission-critical occupational series for the USDA Natural Resource Conservation Services (NRCS). These three mission critical positions together account for approximately 50% of current NRCS employees.
	<b>Department of the Navy</b> — Providing Business Process Evaluation and Facilitation consulting services to their DOD Energetics Center of Excellence organization including independent analysis of current undersea warfare technical execution & analysis.		<b>Federal Emergency Management Agency</b> — Providing Certification & Accreditation, Contingency Planning, Encryption & PKI, Risk Management, Security Policy Development, Security Product Evaluation, Security Architecture, Testing, and Training services as part of a comprehensive IA program to support the CISO.

## WHAT MAKES US DIFFERENT?

Our ability to provide a fully integrated approach to supporting our clients' needs is a key differentiator that sets us apart from other small businesses. Instead of offering a "laundry list" of products and services, we have fashioned our business model to focus first on the client's needs, then develop and implement integrated solutions that harness our specialized technical capabilities. With standardized methodologies, processes and procedures, *Intekras* has a unique ability to provide critical support to a wide spectrum of applications – from the warfighter in the theater of battle to the health professional in the laboratory.

*Intekras* — bringing insight, innovation and integrity to your business and technology challenges.
