mufin player

Product Name

mufin player

Product Description / Release Date

Sound-based Media Player focusing on music discovery and management. Released on August 27 2009, 8am PST.

Sound-based Music Discovery and Management

Mufin player is a media player with focus on sound-based music discovery and management:

- **mufin soundsort**
  Find similar songs faster by sorting your music library by sound similarity.
- **Personal DJ**
  Create playlists automatically, pick a song from the music library and mufin player builds a list of songs that go great together with it.
- **Discover Music**
  Matching music recommendations for each song of the music library. The music recommendations are derived from a database of 6 millions songs. Each song can be listened to and bought, the recommendations are based on sound similarity.
- **Automatically Clean Up Your Songs**
  Automatically corrects misspelled or missing artist, album or song titles.

Share Music with Friends on Twitter, Facebook and Last.fm

Mufin player helps users share their music discoveries using social networks:

- **Tweet It**
  Songs playing on the mufin player can be instantly twittered to friends. With each tweet, a link for listening the song online on mufin.com is provided.
- **Scrobble at Last.fm**
  Songs played in the mufin player can be scrobbled to the user's Last.fm profile.
- **Show Songs on Facebook Profile**
  Songs playing in the mufin player can be shown on the user's Facebook profile in real-time. In addition, friends can listen to the song on Facebook as well if they have the free mufin for Facebook installed.
- **Easy Downloading from Music Websites**
  Mufin player lets users download music from web sites, e.g., music blogs, with

a single click. All downloaded music is automatically added to the music library.

Other Features

The mufin player provides all features commonly found in today's media players, e.g., display of album artwork, syncing with MP3 players and Apple iTunes, ripping and burning of audio CDs in different formats. A detailed overview can be found at http://www.mufin.com/us/mufinplayerpro
