

mufin player pro

Product Name

mufin player pro

Product Description / Release Date

Sound-based Media Player featuring 3D sound universe. Released on August 27 2009, 8am PST.

Interactive 3D Sound Universe

Using mufin's vision technology the mufin player pro greatly simplifies management of a large music collections. All songs in a music library can be clearly represented on a single screen at the same time. Users can find similar songs faster as songs that share similar sound metrics are grouped into different "sound galaxies" within the sound universe.

- **Sound Universe**
Songs in the sound universe are aligned according to the sound metrics of their respective songs. Users can customize which sound metrics are used for display, e.g., tempo, mood, sound density. The closer songs appear visually within the sound universe, the more similar their sound. For example, users may select "tempo" and "mood" to quickly find all their sad and slow songs.
- **3D space**
The sound universe is freely navigable. Moving through it is animated, similar to a computer game.
- **Interactivity**
The sound universe is a fully featured alternative to the classical list-based view common in today's music players. Songs can be listened to or put on playlists using drag'n drop. Searching, renaming, filtering of songs or getting music recommendations is available.

Mufin Player's Bigger Brother

The mufin player pro provides all functionalities found in the free mufin player, e.g. support for Twitter, Facebook and Last.fm. Other feature highlights include:

- **mufin soundsort**
Find similar songs faster by sorting your music library by sound.
- **Automatically Clean Up Your Songs**
Automatically corrects misspelled or missing artist, album or song titles. The

mufin player pro additionally features sound-based duplicate song finder as well as advanced ID3 editing.

- **Discover Music**

Matching music recommendations for each song of the music library. The music recommendations are derived from a database of 6 million songs. Each song can be listened to and bought, the recommendations are based on sound similarity.

- **Tweet It**

Songs playing on the mufin player pro can be instantly twittered to friends. With each tweet, a link for listening the song online on mufin.com is provided.

- **Scrobble at Last.fm**

Songs played in the mufin player pro can be scrobbled to the user's Last.fm profile.

- **Show Songs on Facebook Profile**

Songs playing in the mufin player pro can be shown on the user's Facebook profile in real-time. In addition, friends can listen to the song on Facebook as well.

Other Features

The mufin player pro provides all features commonly found in today's media players, e.g., display of album artwork, syncing with MP3 players and Apple iTunes, ripping and burning of audio CDs in different formats. A detailed overview can be found at <http://www.mufin.com/us/mufinplayerpro>

Screenshot

The screenshot displays the mufin Player PRO interface. The top menu bar includes 'Datei', 'Bearbeiten', 'Meine Musik', 'Fenster', and 'Hilfe'. The main window shows a music library with 4496 titles, 12 tags, 18 hours, and 26 GB of music. The current track is 'Nosebleed' by Maximo Park. The visualization area features a scatter plot of orange and yellow circles on a black background, with axes labeled 'X' (schnell (150) to langsam (50)) and 'Y' (sad to happy). A legend on the right allows for customization of the visualization, including color (Mood_color) and size (Ballroom D...). Below the visualization, a section titled 'Ähnliche Musik zu: Nosebleed von Maximo Park' lists similar tracks: 'The Boss Americana' (81%), 'Florida' (79%), 'Fool To Sorrow' (76%), and 'Trennungslied' (76%). The bottom of the interface shows playback controls for 'Nosebleed - Maximo Park' and an album cover thumbnail.
