

# 6<sup>TH</sup> ANNUAL NORTH SEA DECOMMISSIONING SUMMIT

NOVEMBER 11 – 12 2009 • ARDOE HOUSE HOTEL • ABERDEEN, UK

**DELIVER LOW COST, ON-TIME DECOMMISSIONING  
PROJECTS TO CAPITALISE ON EMERGING  
OPPORTUNITIES IN THE NORTH SEA AND BEYOND**

CONFERENCE • EXHIBITION • ROUNDTABLES • NETWORKING **LOOK INSIDE NOW!**

Bringing together the whole North Sea supply chain to explore the future of the decommissioning market... with a special focus on cutting costs and reducing project timelines

THE BEST QUALIFIED  
SPEAKERS SHARING  
THEIR KNOWLEDGE AND  
EXPERIENCE WITH YOU!

Keith Mayo,  
Head of Offshore  
Decommissioning, DECC

• **EXPLORE FUTURE LEGISLATION WITH DECC AND FORMER OSPAR EXECUTIVES:** Get the inside track on how to future-proof your business for the next wave of regulatory change

• **NETWORK WITH THE HIGHEST LEVEL OF DELEGATES, AND ATTRACT GLOBAL BUSINESS ATTENTION:** Hot off the back of the world's largest ever decommissioning meeting in Houston earlier this year, this is the one North Sea specific event not to be missed

Alan Simcock,  
Former Executive  
Director, OSPAR

• **UPDATE YOURSELF ON THE VERY LATEST IN PRACTICES AND TECHNOLOGIES:** Giving you the opportunity to charge into future decommissioning projects with the best possible equipment and strategy. Can you afford to miss out on these opportunities?

• **TAKE ADVANTAGE OF OUR INCREASED OPERATOR INVOLVEMENT:** Hear what you can do to make your business more attractive to operators, and seize those key contracts. Don't let your competitors get there first!

Alistair Birnie,  
Chief Executive,  
Subsea UK

• **PLANNING, SAVING, LEADING:** Drive down your costs and make the most of the market by maximising your efficiency. Essential for streamlining your business and outstripping the competition

• **INTERNATIONAL INVOLVEMENT:** Explore decommissioning worldwide - learn from mistakes and build on success stories. Don't let ignorance take its toll

EXHIBITORS

ORGANISED BY

**OPEN NOW** for the full conference agenda!

**"Some 470 installations, 10,000 km of pipelines, 15 onshore terminals and 5,000 wells will eventually have to be decommissioned in the UKCS... expenditure is projected to be £19 billion by 2030, rising to £23 billion by 2040"**

**Oil & Gas UK 2009 Economic Report**

## **Seize decommissioning opportunities in 2010 and beyond**

Do you wish you knew when new decommissioning projects were becoming available for tender? Imagine if you were the go-to company for every decommissioning project...

With landmark projects now completed, huge schemes in the pipeline and hundreds more set to be decommissioned before 2025, it's clear that this marketplace represents an incredible opportunity. With an estimated market value exceeding \$15bn, and over 1000 installations remaining in the North Sea, it's no surprise that industry experts are expecting the long-awaited boom. Fluctuating oil prices add ambiguity, but:

- Higher prices = cashflow available for decommissioning
- Lower prices = field life extension less viable

But is this really a win-win for decommissioning? High prices also bring with them the desire to extend field life and low prices, the need to conserve cashflow. So is it actually really a lose-lose? Nonetheless, industry advances are making decom easier and faster, and aging platforms are reaching the end of their production lives. With the maturing market following the Gulf of Mexico's trend, is the long-awaited boom upon us?

## **Why is decommissioning still such a big issue?**

Let's not get ahead of ourselves. In the last decade, timelines have shifted to the right and operators have delayed decommissioning, reluctant to spend the money. Projects have been expensive to run and huge overruns in timescales and cost have created enormous difficulties. These are just some of the challenges that stand in the way of you and the decommissioning goldmine.

This is why EyeforEnergy have upped the ante this year. Don't miss out on:

- More key decision making delegates
- More operator involvement
- An even better speaker line-up
- Better networking opportunities and exhibition spaces

All your competitors will attend, can you afford not to?

Support is coming from all sides for the **6th Annual North Sea Decommissioning conference**, including **DECC, OSPAR, Scottish Enterprise, Subsea UK** and more! EyeforEnergy are bringing together the highest levels of personnel to reveal the latest technologies and strategies to help you beat the competition and get ahead of the rest. You'd be mad not to attend!

In 2008, over 100 executive decision makers from companies like **OSPAR, Hess, BP, Perenco, Maersk, Marathon, Shell, ExxonMobil, Technip, Tetrattech** and **Weatherford** attended. This year is set to be even bigger with **150% more operator involvement**, better networking opportunities and a fantastic speaker line up.

EyeforEnergy are well established as global leaders in decommissioning conferences. Our ground-breaking Gulf of Mexico decommissioning summit was *the largest decommissioning meeting ever*, with over 350 decommissioning experts attending. This, and our inaugural event in the Asia-Pacific market taking place in October, put EyeforEnergy firmly in front as decommissioning business intelligence providers.

## **So what are we giving to you?**

### **Know the ins and outs of the legislative future.**

Get educated on the latest environmental updates and legislation, including candid thoughts from DECC and OSPAR on where regulations might head.

**Building on months of dedicated research with the most experienced professionals**, industry bodies, contractors and operators, we've discovered exactly what the industry needs to hear about, and supplied it! The 6th Annual North Sea Decommissioning conference is sure to give you all the answers, so you don't get left behind!

**In two action packed days, we will examine a wide range of pertinent topics, and take advantage of hours of networking.** Get stuck in to the detailed depths of decommissioning practices, and grab the torch to lead the way. Make sure you join us!

**Learn how the decommissioning market is shaping up**, where the next contracts are coming from and how the latest projects have panned out. Overcome problems and operator objections by experiencing solutions first hand, and give yourself the competitive edge.

**Hear how to plan a decommissioning operation effectively and on-time.** Easily avoided overruns have led to huge financial losses in the past, so put a stop to this, and take the step to planning ease with key insight from speakers who've negotiated the path to profitability successfully already. Enhance your reputation, streamline your business and leave others trailing behind you!

**Improve your strategy to give you the edge in a turbulent market.** Drive down your costs, gain more operator interest and increase efficiency. How can you survive in a competitive market without this?

### **Plus, get right up-to-the-minute information on the very latest in technological advances.**

From efficiency and speed to effectiveness and cost, your business will come out of this event with a brand new outlook on decommissioning and the ability to massively increase your business opportunities in the North Sea! Explore the latest in pipeline recovery and cleaning, new advances in jacket and topside removal, up-to-date cutting solutions and get all your well P&A questions answered! The technical section of the agenda provides all this and more and **CANNOT BE MISSED!**

With all these opportunities to increase your decommissioning market share, all under one roof, **there is no reason to miss out!** Register today, before it sells out, and take advantage of our fantastic early registration deals to save you up to £400!

As the number of platforms dating from the 1970s and '80s eligible for decommissioning grows, the need to get it right becomes more pressing

**Offshore Technology Magazine**

## **Is this you?**

### **Contractors**

Stay at the cutting edge of technology and strategy, win the North Sea contracts, and make sure you're getting your share of the market. Cut costs, save money and out-perform your competitors. Can you afford to miss out?

### **Operators**

Learn how to slash your spending on decommissioning, eliminate time and cost overrun, and optimise your processes. Don't miss out on this opportunity to let the world's contractors know what you want, and when.

### **Consultants / Analysts**

With the very latest on a huge range of topics, your business can't afford to get left behind. Keep your finger on the pulse.

## **4 great reasons you must attend this event:**

Explore future legislation with DECC and former OSPAR executives: Get the inside track on how to future-proof your business for the next wave of regulatory change

Network with the highest level of delegates, and attract global business attention through EyeforEnergy's ever-expanding worldwide network of attendees. Make sure you join them!

Take advantage of our increased operator involvement! Hear what you can do to make your business more attractive to operators, and seize those key contracts. Don't let your competitors get there first!

Update yourself on the very latest in practices and technologies, giving you the opportunity to charge into future decommissioning projects with the best possible equipment and strategy. Can you afford to miss out on these opportunities?

**Phone now! +44 20 7375 7575**

## EVENT AT A GLANCE

Take a peek at how the summit will run over the two days, and get a preview of the headline topics that you'll get to hear about so you can plan your time to get the best value for your business.

DATE	MORNING	AFTERNOON	EVENING
<b>DAY 1</b> (11 <sup>th</sup> Nov)	LEGISLATION & MARKET DYNAMICS  TIMESCALES AND PLANNING FOR DECOMMISSIONING	RE-USE, RECYCLING & DISPOSAL STRATEGIES  KEYNOTE ADDRESS: LOW CARBON DECOMMISSIONING	NETWORKING DRINKS PARTY
<b>DAY 2</b> (12 <sup>th</sup> Nov)	IN DEPTH ROUNDTABLE SESSIONS	THE LATEST TECHNOLOGY UPDATES, NEW INNOVATIONS AND SERVICE DEVELOPMENTS FOR DECOMMISSIONING	END OF CONFERENCE

## WHO HAS ATTENDED OUR PREVIOUS DECOMMISSIONING EVENTS?

EyeforEnergy decommissioning conferences have attracted an enormous range of high ranking personnel, including CEOs, Directors and Decommissioning managers from the likes of:

- Acteon
- AF Decom
- Aker Marine Contractors
- Allseas
- **Apache**
- Areva Risk Management
- AMEC
- BJ Services
- Bluegrass
- Bluemoon Petroleum
- Bluewater Energy Services
- BMT Cordah
- BNP Paribas
- Bodycote
- **BP**
- Broad Energy Development
- **Chevron**
- **ConocoPhillips**
- CMS Cameron McKenna
- CUT UK
- D&F Green Decom
- Deep Ocean
- Deloitte
- **DECC**
- Dynamic Equipment Company
- **ENI**
- **Exxon Mobil**
- Gassco
- Genesis Oil & Gas
- Global Industries
- **Halliburton**
- Harland and Wolff
- **Heerema**
- **Hess**
- Hyperion Energy
- IMCA
- InterAct
- IWS
- JP Kenny
- LDC
- **Maersk Oil**
- **Marathon**
- Mariner Energy
- NCA
- NPD
- Nuvia
- ODS Petrodata
- OSPAR
- Paragon Subsea
- Peterhead Decommissioning
- Perenco
- Prosafe Offshore
- **Proserv**
- Ramboll
- Rotech
- **Saipem**
- Scottish Enterprise
- SeaMetric
- **Shell**
- SMIT
- Squibb International
- **StatoilHydro**
- Superior Energy Services
- Technip
- Tetra Tech
- **Total**
- Trico Marine
- Venn Engineering
- Wachs
- **Weatherford**
- Wild Well Control
- Wintershall
- Wood Group

FOR MORE INFO ON WHO YOU'LL MEET IN ABERDEEN IN NOVEMBER, VISIT  
[WWW.EYEFORENERGY.COM/NSD](http://WWW.EYEFORENERGY.COM/NSD)

## A BREAKDOWN OF THE COMPANIES YOU'LL MEET:

Every year, EyeforEnergy events attract the highest level of attendees from an enormous range of companies from the North Sea and Worldwide.

Our last decommissioning conference broke down as follows:

- Lead Contractors
- Operators
- Consultants
- Governmental
- Sub Contractors

The earlier you register, the bigger the discount!

## DECOMMISSIONING MARKET UPDATE: LEGISLATIVE DRIVERS AND EMERGING OPPORTUNITIES

### Section speakers include:

Alastair Birnie, *Chief Executive, Subsea UK*  
Keith Mayo, *Head – Offshore Decommissioning, DECC*  
Judith Aldersey-Williams, *Partner, CMS Cameron McKenna*

### Subsea Decommissioning - Key factors to be considered

The industry has anticipated the onset of decommissioning for some time, but progress has been slower than anticipated and has led to a level scepticism in the contracting community as to when it will happen and whether it will be a profitable market.

- Explore the key factors in determining the decommissioning profile, and examine factors which may ultimately affect decisions
- Investigate how decommissioning outlooks are dependant on the life-extension or possible re-use of existing infrastructure
- Examine the effects of taxation and liability on decommissioning incentives, and how operational capacity of facilities can ultimately affect plans.

### The future of North Sea decommissioning legislation

Knowing the legal framework surrounding decommissioning in the North Sea is essential if you are to effectively plan for the future. Join our experts as we provide a thorough outlook for the future of legislation, and how it will affect you.

- Examine the latest regime developments and how they have affected the industry
- Hear our legal experts' opinions on how laws may change in the future, what extra difficulties there may be to overcome and what opportunities for cost reduction may emerge
- Forewarned is forearmed: understand the importance of refining your business now to prepare for new laws and developments across the North Sea region

### Developing a sustainable decommissioning supply chain

The decommissioning industry in the North Sea has united. The recently formed supply chain steering group has produced 'Decom North Sea'; a trade association designed to further the decommissioning industry in the North Sea.

- Hear the first public announcements from Decom North Sea and discover what their aims and objectives are for the future
- Learn how representation through the trade association can enhance your business opportunities, contract possibilities and industry influence
- Explore mid-long term development trends as we try to paint a picture of the North Sea decommissioning industry in 2015, 2020 and beyond

## Global round-up: Decommissioning in the GoM, South-East Asia and beyond

Make the most of this intensive half-hour round-up of global decommissioning markets courtesy of EyeforEnergy's ever growing network of international partners.

- Benefit from a review of the last 12 months in the Gulf of Mexico with unrivalled quantitative data and unbiased project appraisal including cost estimations, seasonal trends... and much more
- Hear details of forthcoming work in the Asia-Pacific region following EyeforEnergy's inaugural conference in Kuala Lumpur
- Consider timelines for decommissioning work in other maturing provinces as we look to build a comprehensive global chronology

## GETTING TO GRIPS WITH DECOMMISSIONING PLANNING & PROJECT MANAGEMENT

### Section speakers include:

Roy Aspden, *Head of Decommissioning, AMEC*  
Tom Leeson, *Well Services and Technology Manager, TSMarine*  
Robert C. Byrd, *Senior Vice President, Proserv Offshore*

### Driving down the cost of decommissioning

In a turbulent, competitive market, it is difficult to provide a low-cost service, remain competitive and invest in new techniques and technologies to stay ahead of the competition.

- Explore various approaches which can drive down costs, and hence place you at the forefront of the industry
- Learn from other industry sectors, and examine how co-operative deals can enhance productivity and profits
- Streamline the transition between late life operations and decommissioning, and eliminate wasted time and money

### Saving time and making money: a guide to multi-client projects

Traditionally, contractors have been employed by single operators for single projects, leaving space between work which makes decommissioning unnecessarily inefficient and expensive.

- Learn from experience gained in the last 9 months how multi-client programming can provide impressive cost reduction results
- Investigate the underlying details surrounding multi-client project planning and lump-sum pricing, and how to facilitate this approach
- Hear UKCS case-studies of improved rigless methodologies and rig-chase wellhead severance

### Taking on decommissioning liability: a novel approach to project contracting

- See how assuming asset ownership and taking on decommissioning liability can increase business activity and provide a real decommissioning incentive to operators
- Get the inside track on a lump-sum decommissioning and debris removal project in the Gulf of Mexico following the 2008 hurricanes
- Hear how the allocation of risk between the various parties involved in the project was managed effectively - what contract terms were employed?

## STRATEGIES FOR ENVIRONMENTAL IMPACT REDUCTION, RE-USE, RECYCLING & DISPOSAL

### Section speakers include:

Thor Sterker, *Managing Director, Platform Brokers*  
Gordon Picken, *Managing Director, BMT Cordah*  
Keith Mayo, *Head – Offshore Decommissioning, DECC*  
Harald Ramfjord, *Technology Director, Beerenberg Frontier*  
Alan Simcock, *Former Executive Director, OSPAR*  
Rachel O'Donnell, *Decommissioning Manager, Veolia*  
James Johnson, *Decommissioning Manager, Peterson SBS*

### Platform removal and re-use: ins and outs uncovered

Reusing platforms which have been transferred from other sites can save a large amount of construction time as well as dramatically reducing waste and the cost of dismantling and recycling.

- Hear expert views on platform removal, re-use and dismantling, and hear how such experiences can be applied to your project to great effect
- Investigate the pros and cons of platform re-use and hear success stories (or otherwise) from all such operations to date
- Learn about licensing and permitting issues relating to platform waste, and explore how these can be overcome

### Decommissioning - An Onshore perspective

Offshore cutting, lifting and dismantling often takes all the focus of decommissioning interest, and leaves onshore processing on the sidelines. What happens offshore, however, is only the beginning.

- Learn the effects offshore processing can have on onshore activities and how planning for onshore processes can save you money
- Maximise the efficiency of your entire decommissioning process by providing the right information for processing routes onshore
- Eliminate waste and exceed requirements with this vital guide to maximising re-use and recycling, pushing your business ahead of competition

## KEYNOTE PRESENTATION & PANEL: AN INDUSTRY FIRST

### Decommissioning and the real EIA: the dawn of low carbon decom?

As we move into an era of unprecedented carbon footprint awareness, is it time for us to once again question the true environmental impact of decommissioning? Is complete removal always the best option or should we be taking a more holistic approach which considers the impact on the planet as a whole and fully explores options for low-cost, low-carbon rigs-to-reefs campaigns? Discuss the most hotly contested environmental questions in the industry as we debate whether this market should even exist and how it will no doubt change in the future.

- Debate the possibility of a change in attitudes towards decommissioning, and whether opinions are starting to change in a way which may drive full studies and ultimately legislative change
- Investigate the true carbon footprint of offshore decommissioning and weigh this against proven and perceived environmental impacts for other options
- Hear how future regulations could be affected by this low-carbon debate, and where that will leave the decommissioning industry

Led by:  
Keith Mayo, *Head – Offshore Decommissioning, DECC*

# YOUR 2-DAY BLUEPRINT FOR DECOMMISSIONING EXCELLENCE

## NEW TECHNOLOGY & SERVICE DEVELOPMENTS FOR OFFSHORE DECOMMISSIONING

### Section speakers include:

Kevin Stephen, *Project Manager - Don*, **Helix**  
Duncan Griffiths, *Director*, **CUT**  
Edward Heerema, *Managing Director*, **Allseas**  
Johan Andresen, *Managing Director*, **Seametric**  
Jan Rodseth, *Project Manager*, **Frigg**, **Aker Solutions**  
Laurence J Abney, *Manager – Pipeline and Process Services*, **Halliburton**  
Per Lund, *Vice President*, **NCA**  
Geir Helge Bachmann, *Methods and Services Director*, **DeepOcean**  
Keith Mayo, *Head – Offshore Decommissioning*, **DECC**

### Before decommissioning: determining the condition of the primary facility and associated infrastructure

Lack of knowledge about the state of a facility prior to decommissioning can lead to huge overruns in costs and timing throughout the project.

- Learn how minimum expenditure prior to decommissioning can save huge expense further into the process
- Hear how scanning laser technology can electronically map topsides to find the state of a structure prior to decommissioning and produce a blueprint for initial work
- Find out how existing technology can provide you with well configuration details and P&A requirements

### Delivering cleaning and decontamination best practice in the decommissioning process

Over the lifetime of any facility or infrastructure, hazardous and poisonous chemicals and materials can accumulate. To ensure both human and environmental safety, these must be handled and disposed of with care.

- How clean is clean? Hear the latest legislation, how it applies to decommissioning practice, how to ensure health and safety guidelines are adhered to, and how to incorporate consideration of hazardous materials into an effective EIA
- Learn how optimised cleaning processes can make decommissioning quicker and easier, and how you can apply these processes to your projects, and stay one step ahead of legislation

### Light well intervention vessel (LWIV) abandonment: Lessons from the Don field

Existing techniques for well abandonment can be effectively used on a large number of subsea wells, and the scope for expanding this to abandon both platform wells and tie-back developments from a vessel is broadening.

- Hear the history and current status of BP's Don field, and update yourself on its developments
- Investigate the scope of the LWIV's applications, including real insight on how it can be utilised, and how it can help you
- Take away valuable lessons learnt during the Don project, and equip yourself with the expertise to effectively implement such approaches in future

### Cutting update: developing the best underwater technologies

Exceeding planned timelines, excessive man-hours, and weather delays. All of these can cause huge over-runs in costs and new technology is emerging to combat them.

- Learn from successful case studies of the last 12-18 months, including Frigg and NW Hutton, how enhanced cutting solutions are increasing efficiency and lowering costs
- Investigate the development and North Sea application of the latest innovation in "stepped" cutting technology
- Explore the Fast Sealine Recovery System (FSRS), and see how it is greatly reducing pipeline cutting and recovery times, providing vastly improved efficiency

### Plus... Cutting technologies panel

Hear the latest progress in subsea cutting from our panel of experts, and update yourself on the most recent technological developments and latest projects.

### Assessing the best topside removal approaches: piece small vs. single-lift

Topside removal is a vital part of the decommissioning process, and the most effective approach varies with the size, type, and condition of what is being removed. Evaluating these two key approaches is crucial to saving time and money.

- Explore the pros and cons of the piece small approach, and examine the effectiveness of the technique on varying types of topsides
- Investigate the single lift method, how it can benefit removal, and what limitations the process presents
- Cost appraise piece small vs. single lift approaches, and investigate the outcome of project decisions to date

### Plus... Vessel availability update

In a series of intimate roundtables hear directly from owners about the real availability of the world's heavy lift vessels. Understand what this means for your business planning going forward

### Using buoyancy aids to assist floatation jacket removal

With a variety of technologies being investigated and developed, and everyone in the industry trying to save money, constant updates on the latest innovation in jacket removal is crucial.

- Floating the idea of buoyancy – hear the latest on this novel alternative to single jacket lifting
- Examine the technical approach to buoyancy assisted decommissioning, and find out how it is being employed in real-world scenarios
- Learn about some economic advantages of the buoyancy method, and how it can benefit decommissioning projects both in terms of cost and ease

### Recovering and decommissioning pipelines in the North Sea

With legislation surrounding pipeline decommissioning still hazy, and technology improving all the time, stay one step ahead with this appraisal of the ins and outs of pipeline innovation.

- The OSPAR/DECC perspective: investigate the legislation surrounding pipeline recovery, and what's likely to change in the future – straight from the horse's mouth
- Learn from recent case studies the challenges and solutions surrounding offshore decommissioning of pipelines, and how efficient processing can save a lot of money and time
- Compare offshore and onshore pipeline decommissioning processes and gain insight into the technicalities of pipeline recovery

### Plus... New pipeline decommissioning innovations panel

Expert opinion on existing and emerging pipeline recovery technologies.

### The ROV revolution: the move to lower risk subsea operations

A one in six hundred fatality rate among divers is a huge driving force for exclusive ROV operation and the transition is already underway.

- Examine the risks in traditional diver-based operations, and how Remotely Operated Vehicles (ROVs) are saving lives and improving efficiency
- Discover the benefits of using ROVs instead of divers for subsea operations, especially for decommissioning work
- Explore how various ROV-operated cutting technologies are becoming more accurate, reliable and functional
- Get insight into the operational experience achieved from previous diverless decommissioning projects in the North Sea

## FOCUSSED WORKING GROUP DISCUSSIONS

EyeforEnergy introduces a brand new format for summit discussions making them more focused & producing more practical steps to action. Simply put, they are results oriented roundtable discussions with moderators, real situations and action points.

### OPERATOR DISCUSSION TABLES

Moderated by key representatives from many major North Sea operators, this is your chance to:

- Find out the truth about their plans for decommissioning, and timelines for projects available for tender
- Hear from the horse's mouth exactly what North Sea operators are looking for, and how you can fine-tune your business to win those contracts

With more operators coming on board all the time, you can't afford to miss this!

### Already Confirmed:

• BP • SHELL • PERENCO

...And loads more to be announced!

This is the first confirmed topic from up to 6 focussed roundtable discussion sessions. Further topics will be announced monthly in the run-up to the event. If there's something you want to discuss, or someone you'd like to hear from just let us know and we'll make it happen. E-mail [tlovatt@eyeforenergy.com](mailto:tlovatt@eyeforenergy.com) now!

## Networking Drinks

On the evening of 11th November (Day 1), EyeforEnergy are hosting the decommissioning networking drinks reception of the year. Enjoy a relaxed evening of networking with executive decision makers from the entire decommissioning supply chain. Use this amazing opportunity to build those business relationships which will send you profitably into 2010. This unique evening will gather everyone you need to talk to, all under one roof, for one night only!

## DON'T MISS OUT ON OUR EXHIBITION SPACE - GET ON BOARD NOW!

## North Sea Decommissioning Exhibition Space: Get your products seen by the right people!

### Why Sponsor or Exhibit?

- ★ Truly targeted marketing opportunities
- ★ Certain ROI with 6 years of precedent
- ★ A thoughtfully designed exhibition room
- ★ Unrivalled brand exposure
- ★ Valuable networking time
- ★ Bespoke packages for all budgets

This November in Aberdeen, world leading decommissioning companies will gather to hear from those leading the way in delivering industry best practice strategies that will reduce costs and improve efficiency in the decommissioning industry across the globe.

The 6th Annual North Sea Decommissioning conference offers an excellent range of sponsorship and exhibition opportunities to suit every need and budget. Top decommissioning executives from every section of the supply chain will come together to candidly discuss the most pressing technical and strategic issues facing the industry today. If you need our speakers and delegates as partners or clients this event is a big opportunity for you to meet, greet and impress them in person.

So, if you have a solution or service that can help operators or lead contractors in their quest to slash costs, plan projects efficiently and capitalise on emerging decommissioning opportunities, make sure you sign up today to secure your exclusive position at the summit – with very limited space and opportunities available, you simply can't fail to get excellent exposure for your company and secure real business benefits.

**For a quick discussion of the variety of sponsorship and/or exhibition opportunities we have available, call Everad MacIndoe on +44 20 7375 7560 or email [emacindoe@eyeforeenergy.com](mailto:emacindoe@eyeforeenergy.com) now!!**

## BUT DON'T TAKE OUR WORD FOR IT

“Organised brilliantly and supported by a great mix of companies from the business. Hats off to you for a job well done.”  
Liberty International Underwriters

“Great to see operator involvement and new business opportunities!”  
NCA

“The right mix of clients and vendors and, more to the point, the decision makers with the client companies. We picked up several leads as a result of the conference.”  
Tetra Technologies

**The earlier you register, the bigger the discount!**

# 6<sup>TH</sup> ANNUAL NORTH SEA DECOMMISSIONING SUMMIT

## IS THIS EVENT RIGHT FOR YOU?

This summit brings together companies from right across the decommissioning supply chain.

### TYPES OF DELEGATES IN ATTENDANCE:

- C-Level executives
- Directors
- Operations Managers
- Owners/Founders
- Decommissioning Project Managers
- Government Officials
- Consultants
- Business Development Managers
- Supply Chain Managers
- Senior Engineers

You'll be joining representatives from all types of operator & service companies.

### TYPES OF COMPANIES

- Operators
- Lead Contractors
- Sub-contractors
- Local & Regional Government
- Regulatory Bodies
- Legal firms
- Independent Consultants
- Environmental Experts
- Industry Associations
- NGOs

## WHY YOUR COMPANY NEEDS YOU HERE

- You will be able to benchmark how far away – or how close – you are to your peers across the decommissioning industry, both in the North Sea and beyond. This will give you invaluable knowledge and insight into the best ways to reduce costs, improve efficiencies and smash through your profit targets! **You will be your company's expert on emerging trends & technologies amongst the industry's leading players.**
- The two days spent at this summit will give you more than weeks of training courses. **Save your department time and money** by attending this one stop shop for all things decommissioning, and give your company the best possible chance to make 2010 the most profitable year ever!
- Return to your office armed with critical decommissioning knowledge. It will be **your ideas, strategies and contacts** that ensure your business leads the way when it comes to maximising your decommissioning business potential

## 3 EASY STEPS TO REGISTER NOW!

### Step 1: Choose Your Registration Package

# 6<sup>TH</sup> ANNUAL NORTH SEA DECOMMISSIONING SUMMIT

NOVEMBER 11 – 12 2009 • ARDOE HOUSE HOTEL • ABERDEEN, UK

**DELIVER LOW COST, ON-TIME DECOMMISSIONING  
PROJECTS TO CAPITALISE ON EMERGING  
OPPORTUNITIES IN THE NORTH SEA AND BEYOND**

CONFERENCE • EXHIBITION • ROUNDTABLES • NETWORKING **LOOK INSIDE NOW!**

Bringing together the whole North Sea supply chain to explore the future of the decommissioning market... with a special focus on cutting costs and reducing project timelines

THE BEST QUALIFIED  
SPEAKERS SHARING  
THEIR KNOWLEDGE AND  
EXPERIENCE WITH YOU!

Keith Mayo,  
Head of Offshore  
Decommissioning, DECC

• **EXPLORE FUTURE LEGISLATION WITH DECC AND FORMER OSPAR EXECUTIVES:** Get the inside track on how to future-proof your business for the next wave of regulatory change

• **NETWORK WITH THE HIGHEST LEVEL OF DELEGATES, AND ATTRACT GLOBAL BUSINESS ATTENTION:** Hot off the back of the world's largest ever decommissioning meeting in Houston earlier this year, this is the one North Sea specific event not to be missed

Alan Simcock,  
Former Executive  
Director, OSPAR

• **UPDATE YOURSELF ON THE VERY LATEST IN PRACTICES AND TECHNOLOGIES:** giving you the opportunity to charge into future decommissioning projects with the best possible equipment and strategy. Can you afford to miss out on these opportunities?

• **TAKE ADVANTAGE OF OUR INCREASED OPERATOR INVOLVEMENT:** Hear what you can do to make your business more attractive to operators, and seize those key contracts. Don't let your competitors get there first!

Alistair Birnie,  
Chief Executive,  
Subsea UK

• **PLANNING, SAVING, LEADING:** Drive down your costs and make the most of the market by maximising your efficiency. Essential for streamlining your business and outstripping the competition

• **INTERNATIONAL INVOLVEMENT:** Explore decommissioning worldwide - learn from mistakes and build on success stories. Don't let ignorance take its toll
