

2009 Cloud Computing Conference

Network, Learn & Interact With Top Industry Players.

Demystifying The Cloud

Join your fellow IT and technology professionals for San Diego's premier cloud computing event, September 9th, 2009. This is not your typical conference filled with theory and conjecture; but a real world look at what's being done in the cloud today. Separate myth from reality, while learning about the cloud's opportunities and challenges. Gain an overview of the multi-vendor, multi-product cloudscape combined with real-world examples and insightful analysis. Do you know how the cloud will change the way IT services are delivered within your organization? What is your impression of the cloud? How will it affect the future of your business? Our featured speakers will help to answer these questions and much more.

Featured Speakers:

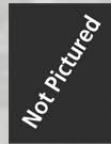

John Igoe
Director of Advanced Service Technology
Dell's Services Organization

Peter Coffee
Director of Platform Research
Salesforce.com

Ned Curic
Principal Platform Strategist
Microsoft

Alyssa Henry
Director of Amazon Web Services
Amazon.com
