Protect your privacy and your PC. Detects and removes spyware, adware, Trojans, keyloggers, browser hijackers and malware

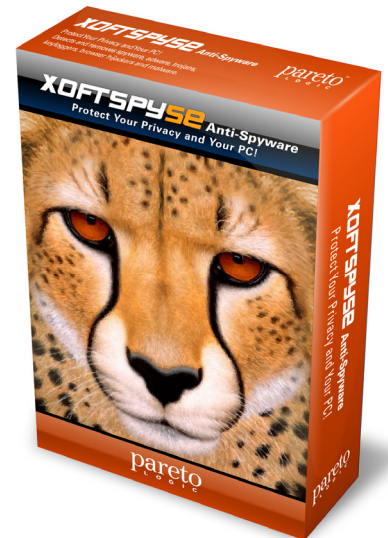

Exceptional Malware Defense

XoftSpySE Anti-Spyware 6.0 bites back with enhanced and upgraded malware scan and removal technology. Spyware and other threats continually try to steal your personal details and credit information. In order to defend against these attackers, you need an advanced and technologically superior security program.

Building on a solid heritage of easy, fast scans with a small footprint on system resources, the newest release of XoftSpySE Anti-Spyware brings a powerful scanning engine to destroy spyware, adware, Trojans, worms, rootkits, and other malware. A new Tools menu contains indispensable security and utility features, allowing users more control over their system and their safety.

In the dangerous online world of malware threats, only the strongest survive. Protect your PC and protect yourself with XoftSpySE Anti-Spyware 6.0: evolved malware protection.

“XoftSpySE is the best antispyware program out there. It keeps my computer safe, and it’s easy to use. Great program.”
Stephan Pinsky, Fresno, Calif. USA
