Social Interactive Tarot

Over 21 million times in any given month someone searches for the following words in Google: Tarot, Horoscope, Psychic or Spells. More often than not they were directed to one of the net's metaphysical sites, but these are typically loaded with pop-up ads and teaser services that result in expensive recurring fees. So even on the web, it can still feel like stumbling onto a seedy, neon-lit alley full of dicey psychics and all-night card reader parlors. **Until now, meet [SpellSpace](http://SpellSpace.com)** where the ancient popularity of the metaphysical finds a fun, addictive and non-threatening place on the web. Here, the seamless interactivity and genuine psychic interpretations offer a truly innovative Web experience delivering highly popular free tarot readings, and social interaction with others from viewing someone's psychic profile to chatting while receiving a live tarot reading viewed by guests.
