

SOCKET SENSE®

Surge Protector

Socket Sense® is the only surge strip that expands to fit your needs. With Socket Sense, each outlet can expand to allow oversized power adapters to plug in. There is no need to rearrange other plugs to make them fit. Just pull Socket Sense to expand, plug in your oversized adapter, and then push Socket Sense back to just the right size.

Socket Sense features:

- 2160 Joules of surge protection
- Integrated cable management
- Both 6ft and 12ft cord lengths

Expands

**To Fit Any
Power Adapter**

Power adapters are a nuisance. When you plug these large adapters into a surge strip they usually block one or two extra sockets.

Expands

**Holds 6
Power Adapters**

Socket Sense is the only surge strip that expands to fit any power adapter on the market. Ordinary surge strips can only handle a few bulky power adapters because they block adjacent sockets. Socket Sense expands from 13 to 18 inches in length. Sockets will never be blocked by power adapters again - we guarantee it.

Don't waste money purchasing two ordinary surge strips when one Socket Sense can do the job. Socket Sense simply expands to a perfect fit - sockets are never blocked.

Socket Sense

**Does the Job of
Two Regular
Surge Strips**

SOCKET SENSE®

Cable Organizer

Sockets may be adjusted to form cable management channels to reduce clutter.

Surge Protection

2160 Joules of protection to help absorb power spikes.

Status LEDs

Red and Green LEDs provide status of surge and ground.

Keyhole Slots
