Specialty

Many firms believe a good disaster recovery plan is not investment worthy because the cost seems to outweigh the risk. But ask any IT decision maker who has experienced disaster without a good plan in place and the odds are that person is now dealing with serious repercussions for not properly protecting the firm's most precious asset.

As we become more dependent on the Internet and 24x7 transactions, we also become more susceptible to disaster, mechanical failure, human error and malicious activity. It's very easy to underestimate the cost of loss, not only by huge disasters, but also by power outages, hardware failures and even hiccups in the telecommunication system that keeps your production sites running.

What aspects of your data are most critical to your operations? How long could you survive without them? And what are you willing to risk? These are some of the questions InfoSystems can help you answer before designing a solid Business Continuity & Resiliency plan.

The InfoSystems partnering methodology takes the solution far beyond making a "quick" sale. We spend a tremendous amount of time exploring your business and long-term goals so we can provide appropriate, custom disaster-recovery protection that makes sense for your entire infrastructure – and your budget. This level of commitment is the reason why so many companies choose InfoSystems over other partners.

Our highly skilled consultants help you determine your Recovery Time Objectives and Recovery Point Objectives so you can identify what data is absolutely critical to your operations. We help you invest in the right tools, and only the right tools, in the areas of:

- Disaster Recovery Planning
- Storage and Backup
- Managed Services
- Network and Systems Monitoring

InfoSystems is an IBM® Premier Business Partner and Microsoft® Gold Certified Partner, which demonstrates a very high degree of competence and expertise with IBM and Microsoft technologies, among many others. Our company has made significant investments in staff training; technical and sales certifications; and a highly sophisticated Business Partner Innovation Center (BPIC) — our on-site, state-of-the-art Proof of Concept lab where you can see solutions in action before integrating them into your own environment.

Don't wait for a costly lesson in disaster recovery. It's a risk you don't have to take with advanced planning. Protect your infrastructure proactively and intelligently with Business Continuity & Resiliency solutions from InfoSystems.
