

VCG Staffing and Recruiting Software Partners with PeopleNet to Deliver Labor Time Tracking Solutions to Staffing Agencies.

Partnership focuses on offering customers turn-key labor time-capturing methods including time clocks, online (Web-based), fax, phone (IVR) and email.

Atlanta, GA, October 20, 2009. VCG, LLC, the developer of software solutions and services that power successful recruiting and staffing companies, today announced its partnership with PeopleNet, a provider of flexible labor tracking systems. Through the partnership, VCG will integrate time-capture data from PeopleNet to its staffing and recruiting software through a time import process that has already been developed and tested.

Steve Taylor, President and CEO of VCG, said “We are committed to delivering solutions to our clients that offer the greatest efficiency. Our own TimeKeeper online time tracking solution is an example of that. However, many clients are in need of timekeeping solutions broader in scope and richer in features than what TimeKeeper provides. For example, many staffing agencies would like to have a solution that integrates time-capture data from various time clocks or phone IVR systems with their VCG staffing software. Our partnership with PeopleNet gives our customers access to an array of very good solutions to meet those more diverse needs.”

Providing customers the option of choosing VCG’s TimeKeeper product or PeopleNet’s suite of timekeeping solutions allows the customer the greatest number of options backed by superior service and commitment to the staffing industry.

Phil Sadler, President and CEO of PeopleNet said, “The PeopleNet outsourced approach to automated time tracking compliments VCG’s strong software capabilities for the Staffing Industry. Our continued development of new products and services provides our customers with a variety of solutions including web and email-based time capture and approval, expense tracking and others, which are easily managed through the PeopleNet Dashboard and Host System. All solutions are available with an automatic, seamless data exchange between VCG and PeopleNet for employee data, daily assignment data and pay file delivery at the close of the pay period”.
