www.diamondbackdrugs.com

Diamondback Drugs specializes in custom compounding for prescribers and patients nationwide. Compounding enables the prescribing of medications in unique strengths and dosage forms on an individual patient basis. Through compounding, we can prepare formulations containing the exact dose of active ingredient(s), in dosage forms that are easy to administer and which taste great.

The ability to have prescriptions compounded is especially useful for veterinarians, dermatologists, gynecologists and podiatrists because many products they are used to using have either been discontinued by the manufacturer or are not available in the strength or combination required. At Diamondback Drugs, we stock the widest range of medications, chemicals, bases and flavors. Our State of the Art equipment assures top quality and pharmaceutical elegance while helping to reduce overall product cost. All of our pharmacists and technicians have undergone specialized training in basic compounding, sterile compounding of injectables and ophthalmic products, and veterinary compounding. And, unlike most pharmacies, compounding is our primary business, so your prescription will receive prompt and complete attention.

Most packages are shipped via Priority Mail and can be delivered to any address 6 days a week. Our internet based shipping system allows us to track the location of your prescription from the time it leaves us until the minute it reaches you. Expect delivery within 4 working days from the time you place your order. All major credit cards are accepted and our toll-free phone and fax lines are always open.

It is said that work, well done, is art. At Diamondback Drugs, we are continually striving to perfect the art and science of pharmaceutical compounding.

The following represents many of the products we have currently compounded. No list is comprehensive, since we are constantly receiving requests for new products, combinations and formulations. Likewise, since concentrations and quantities can vary, it is impossible to provide a price list in this format. Please feel free to call with any questions. We love a challenge.

FREE DELIVERY TO CLINIC

We ship via priority mail, UPS or FedEx. Our internet-based tracking system insures accountability for your package from the time it leaves us until delivered to your patient or clinic. Most orders will be processed and shipped the same day they are received. Most deliveries are received within 4 business days.

PAYMENT

We accept Visa, Mastercard, American Express and Discover. Terms can also be arranged for clinics and wholesale accounts.
