MySign TV

" One of the world's leading dynamic presentation software and digital signage companies "

MySignTV allows you to create a professional looking presentation combining any number of different digital media formats, such as Flash, Movies, Music, Jpeg, Webpages, Powerpoint and Documents.

You can also show live TV footage if desired. The presentation can be made up of various elements showing together on one slide because of the split screen capability of the software.

The software still allows you to create presentations with a combination of digital media formats as is the case with our Workstation version, although this presentation can now be sent to various locations at the touch of a button.

MySignTV enables you to reach out to a wider audience simultaneously via multiple screens which can be in many different locations, either in the US or Worldwide.

- ✓ Easy to use interface
- ✓ Highly versatile licensing system.
- ✓ Flexible content design & scheduling
- ✓ Remote management support
- ✓ Lowest price on the martket
- ✓ No obligation support, pay per action!

Each presentation can be scheduled to run at different times of the day and on different days of the week depending upon the message and the audience you are targeting.

This application is well suited to those who wish to run advertising campaigns, where to the second reports need to be produced for which advert ran, when, etc.

Both the MySignTV and MySignTV Pro software run smoothly on virtually any Windows computer and have a familiar player interface that's intuitive and easy to use. The dynamic, pro-quality multi-media looping presentations made with MySignTV can have a decisive impact at exhibitions and trade shows as well as in shop windows, POS, waiting rooms, hotel lobbies etc.
