SUMMARY

Senior software engineer with 8+ years of programming experience including Java, database systems, Y2K verification, and COBOL migration. Demonstrated ability to direct and motivate a team of software engineers to complete projects meeting specifications, deadlines, and budgets. Expertise in determining customer needs and effectively translating those needs into software solutions. In-depth knowledge of operating system functions and techniques to optimize legacy code.

EXPERIENCE

BTY RECRUITING SOLUTIONS, New York, NY

2006 - Present

Lead Software Engineer

Managed a team of 12 software engineers to improve large relational databases for an Employee Recruiting company. Collaborated with Marketing Department to identify new products and features, develop mid-term business strategy, and aggressive, short-deadline technology convergence plans. Directed software engineers and third-party contractors on programming methodology, priorities, and deadlines, allocating resources as needed.

- Led development team in major product release, completing project ahead of schedule and under budget
- Developed complex applications to deliver data-driven content to Web users
- Ported source code to multiple platforms to widen product availability and increase sales by 45%
- Evaluated third-party Web applets and prototyped, developed, tested, and delivered solutions for secure employee-benefit Web pages
