Auto ID Solutions Certified as a GS1 Solutions Partner Consultant

Tuesday, November 10, 2009 – Auto ID Solutions certified as a GS1 Solutions Partner Consultant

Auto ID Solutions is pleased to announce certification as a GS1 Solutions partner by GS1. Solution Partners are certified to ensure expert knowledge of the GS1 and ISO standards that relate to automatic identification (bar coding and RFID technology).

Auto ID Solutions offers a variety of solutions that are tested, proven and ready for use such as bar code software, bar code printers, bar code verifiers, and consultation of automatic identification equipment and retail supply chain best practices.

Benefits for Supply Chain Companies using a Certified Solution Partner:

- Enables cost-savings through proven implementation solutions
- Offers a unique, certified resource of standards-compliant services
- Assists companies in quickly integrating GS1 System standards
- Helps companies realize the business benefits of automatic identification equipment

“We have been impressed with the GS1 Solutions Partner program for a few years but decided it was to join the program this year because of an increased amount of confusion about bar coding and bar code quality in the marketplace. This certification will give our clients confidence in the information we provide and demonstrates our commitment to being experts on bar codes.”, said Christopher French, Vice President of Business Development at Auto ID Solutions

About GS1

GS1 is a neutral, not-for-profit organization dedicated to the design and implementation of global standards and solutions to improve the efficiency and visibility in supply chains. GS1 is driven by more than a million companies, who execute more than five billion transactions a day with the GS1 System of Standards. This makes it the most widely used supply chain standards system in the world.
