**Microsoft Award Winning Team to Offer Globally Integrated Consultative Framework for Exchange Migrations**

*Janalent and NetApp team to tightly integrate applications and data management technologies to provide end-to-end services for migrations from Lotus Notes, Novell GroupWise, or legacy versions of Microsoft Exchange.*

LAS VEGAS – Janalent, a leader in developing and delivering global solutions based on the Microsoft platform, today announced it has teamed with NetApp, a global leader in enterprise storage solutions, to provide customers with a comprehensive set of services, hardware, and software solutions for the migration or upgrade to Microsoft Exchange 2010 and 2007 from Lotus Notes, Novell GroupWise, or legacy versions of Microsoft Exchange.

The joint global solutions launch further strengthens Janalent and NetApp’s existing solutions partnership and combines the global talents of Janalent--Microsoft’s 2009 Worldwide Partner of the Year for Unified Communications - Messaging solutions and NetApp--Microsoft’s 2009 Worldwide Partner of the Year for Storage Solutions.

“We are very excited to provide customers with a holistic approach to Microsoft’s industry leading messaging platform,” said Joe Honan, Janalent’s COO & Vice-President of Solutions. “The ability to combine our experience migrating millions of mailboxes for customers across five continents with NetApp’s industry-leading storage hardware and software products provides customers with a migration path to mitigate risk, reduce costs, and accelerate time to benefit.”

“Janalent was a natural fit for us to round out our application consulting service focused on the migration to Microsoft Exchange 2010 and 2007,” said Gary Zelman, practice director for NetApp’s Application Integration group. “As we have learned through our numerous NetApp dynamic data center solution engagements, enterprises require a proven and repeatable manner to consume and deploy resources. Janalent’s deep migration experience, their expertise across the Microsoft infrastructure platform, and their recognition as Microsoft’s Worldwide Partner of the Year for Messaging in 2009 help us provide a combined level of subject matter expertise that is unrivaled in the industry.”

The joint service will focus on providing comprehensive messaging migration solutions for existing and prospective customers in the mid-market, enterprise, education, and public-sector spaces.
