

Voyant Health Announces Successful Implementation of TraumaCad at Nationally Ranked Hospital

Columbia, MD – November 17, 2009. 2009. Voyant Health™ announced today that Brigham and Women's Hospital (Boston, Mass.) has successfully implemented its industry-leading TraumaCad™ orthopedic templating solution.

Zeev Glozman, Voyant Health CEO, comments, "Our products improve only when customers provide critical feedback. I am honored that an institution of the caliber and prestige of the Brigham has implemented our solution, and look forward to critical feedback and suggestions that will help our products evolve even further."

BRIGHAM AND
WOMEN'S HOSPITAL

"A workflow solution like this gives our orthopedic surgeons and fellows improved access to digital templating and enables us to spend more time with our patients, something we always strive to do," added Ramin Khorasani, MD, MPH, Vice Chair, Department of Radiology; Director, Quality, Safety, and Medical Imaging I.T.; and Associate Professor of Radiology, Harvard Medical School.

"A workflow solution like this gives our orthopedic surgeons and fellows improved access to digital templating and enables us to spend more time with our patients, something we always strive to do."

Voyant Health will be showcasing its solutions at the upcoming Annual Assembly of the Radiological Society of North America, at McCormick Place in Chicago, from November 29 through December 4, 2009. South Hall, Booth # 3055.

About Voyant Health

Voyant Health™ is the new name of Orthocrat—the creator of TraumaCad™. Voyant Health has one mission: dramatically improve the orthopedic surgeon's work life to support high-quality care and allow more time with patients. We help surgeons do this every day by delivering integrated workflow solutions for the clinic, the hospital, the operating room, and beyond.

TraumaCad™, our surgical planning solution, allows surgeons to replicate every action currently performed by tracing on x-ray films, only more conveniently and much faster. TraumaCad is installed at over 1,000 locations in ten countries, including hospitals, clinics and academic institutions. OrthoWeb™ is a highly-secure web-based environment allowing surgeons to upload and access templated images and surgery specifications over the internet—extending their planning beyond the clinic, even into the operating room. VoyantFlow™ provides effortless distribution of patient images to exam rooms. Walk into the exam room, swipe a card, and instantly view the patient's images.

Voyant Health has offices in Columbia, Maryland and Tel Aviv, Israel.
