

Main DocPath® Advantages

Complete solutions designed to cover any document related need

- ♦ Design of dynamic and static forms, with creation at the time of execution of unidimensional and bidimensional barcodes, as well as bar, line and pie charts in 2D and 3D.
- ♦ Logic of events that allow to perform mathematical operations and a wide range of actions on the form using the data obtained from the client applications.
- ♦ Multilanguage: Capacity to use various languages within the same form.
- ♦ Straightforward and easy-to-use design. User-friendly interface.
- ♦ Multiplatform solution: Windows, Unix, Linux, iSeries, zSeries.
- ♦ Wide variety of output formats: PCL, PostScript, AFP, EPL, ZPL, TEC, PDF, PDF/A, QMF, RTF, XML.
- ♦ Multiple document distribution methods: centralized and distributed printing, email, fax, and real-time Web distribution using DocPath® connectors.
- ♦ Integration with any business management application, such as SAP, JD Edwards, Scala, etc.
- ♦ Scalable modular solutions: Licenses are provided for required applications only, allowing clients to easily increase functionalities. Additional modules are available enabling digitalization, form completion via Web, different output formats (AFP, QMF, RTF, etc.).
- ♦ Document archiving and retrieval via Web completely adaptable to every client need (logos, colours, fonts, buttons, etc.).
- ♦ High-qualified team of specialists for installation, configuration, testing and other professional services, including form design.
