

Job Simplicity for Simply Accounting

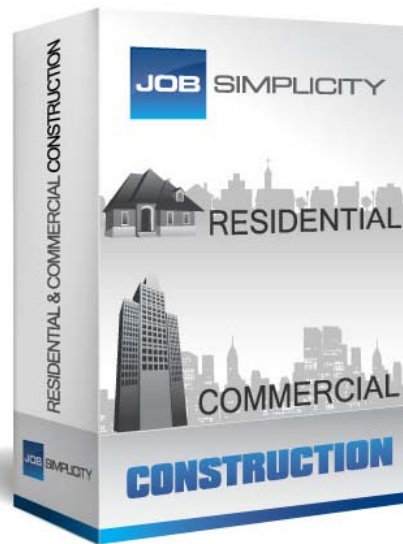

When You'd Rather be **Building** than Balancing the Books ...

JOB SIMPLICITY is designed specifically for small builders who want true construction management tools.

Plug-and-play integration with Simply Accounting means you're up and running day 1 without replacing your accounting system.

Offers Tools That Lay a Strong Foundation for:

Sales & Marketing
Estimating
Bid Management
Purchasing
Scheduling
Job Costing
Service Coordination

Keeping It Simple

Small builders have long struggled to find the process management tools they need. While Simply Accounting is great for writing checks and tracking balances, it simply isn't designed to provide the "true" job costing features you need to build your business.

Job Simplicity keeps it simple, allowing you to add full-scale building management software that plugs right into Simply Accounting. You get tools to manage everything from bidding to building in one affordable, out-of-the-box solution. So why renovate your accounting software when all you need is Job Simplicity?

Building a Smarter Solution

Common challenges like lost change orders, out-of-date spreadsheets, duplicate data entry and tedious manual reporting can cause your slim profit margins to collapse.

- **EASY SET UP** - Plugs into Simply Accounting by Sage so you're up and running on day 1 - all with expert support available when you need it.
- **FULL-SCALE BUILDING** - Manage the entire cycle from bidding to building, eliminate costly mistakes, and improve your bottom line.
- **COMMERCIAL AND RESIDENTIAL** - Two editions offer features for both commercial and residential builders.

With Job Simplicity, one entry carries through your entire system and flows seamlessly to your Simply Accounting software. Take control of profits with real time variance & cost-to-complete reporting, cash flow forecasting and profit analysis.

Plug-and-Play Simplicity

Available in **Commercial** and **Residential** versions, Job Simplicity is designed to be up and running quickly with simple installation and expert support. With features for job costing, estimating, and scheduling, you can bid, build and manage just like your larger competitors.

JOB SIMPLICITY FEATURES ...

“With Job
Simplicity, we
took control
of our job
costs and
schedules and
we didn’t have
to switch our
accounting
system.”

Job Simplicity
Customer
Canada

Whether you’re a small commercial or residential builder, Job Simplicity hammers the competition with features that nail every aspect of construction management including:

- *True job costing with flexible work-break down structures*
- *Estimating tools for unit take-off and bid management*
- *Generate POs and subcontracts from an estimate with the click of a button*
- *Tools to manage multiple schedules per job, including conflict control and trade notifications*
- *“What If” pricing/profit scenarios for jobs, models, and options based on actual or forecasted costs*
- *AP invoice workflow with scanning optimized for PO and Subcontract approval*
- *Putting the Web to Work: Share information, documents & drawings with your customers & trades. Manage your schedules and request POs from the field on any handheld device*

COMMERCIAL BUILDERS count on Job Simplicity for:

- *Progress and cost plus billing*
- *Document management including RFIs, correspondence logs and more*
- *Change Management: track change requests and contract revisions*
- *Subcontract management with draw control tied to scheduling*

RESIDENTIAL BUILDERS benefit from features that help you:

- *Manage customers, selections and change orders*
- *Generate estimates and POs from customer’s model and option selections*
- *Price custom options with any of the built-in estimating features*
- *Access electronic price books to manage vendor pricing for Models & Options*
- *Finish strong, coordinate trades & customers for walkthroughs & service calls*
