Chapter 1 Green Resolutions for the New Year

Introduction

Perhaps swearing off all sugar or vowing to not drink caffeine are difficult New Year's resolutions to keep. Many of us have written them on our lists year after year, only to fail miserably at keeping them.

It's time to start on an easier task. Some habits are very hard to break, but others are fairly simple. Rather than attempt those big habits, let's start with some simple ones. We need to protect our planet and save the environment. There are habits we can break easily that will accomplish this, assure a better future for our children and save you money right now as well!

Make a resolution to:

- Recycle everyday materials: Plastic, glass and paper can be recycled. Make separate bins for these items. You'll be able to drop them off at a recycling center in your town. Many have free services available to you.
- Avoid the fast food joints: Cooking at home saves money, but it also will prevent a lot of plastic and Styrofoam from being dumped in our landfills.
- Replace your dishwasher with an Energy Star machine: Sometime during the coming year you'll find a bargain on a dishwasher. You will find the Energy Star qualified dishwashers will not use as much water or electricity.
- Carpool: With the economy in the state it is now, you'll find others are also looking for ways to save. Carpooling saves gas, prevents our atmosphere from being clogged with carbon monoxide, and makes your car last longer!
- Use remanufactured or compatible toner cartridges and ink cartridges: These remanufactured models not only cost less, but are better for our environment. Rather than toss out those cartridges, manufacturers reuse them by cleaning, inspecting and filling them carefully. Better than landfills overrun with cartridge parts that aren't biodegradable!

At Inkjet Superstore.com, we are happy to provide you with high quality remanufactured ink and toner cartridges. They meet or exceed the OEM models in their output and quality and cost a lot less!

Chapter 2 Holiday Recycling

Introduction

In past years holiday waste has made its way to our landfills. Did you know that about 38,000 miles of ribbon is thrown out every year? Billions of holiday cards, once read and displayed for a short time, are thrown away. Every year 40 billion batteries are sold, many powering special Christmas gifts. These too end up in the dumps.

Wouldn't it be wise to take to heart some waste management in your life? Isn't a good thing to cut the amount of trash you throw out?

Tips for Holiday Recycling

- Shop with reusable shopping bags
- Get and give rechargeable batteries and chargers
- Compost the leftover fruits and vegetables from holiday meals
- Use recycled holiday wrapping paper
- Save used gift-wrapping paper to use again next year

There are many other things you can do to save our environment during the holiday season. For instance, you can get an artificial tree rather than a cut one from the sales lot in town. Over 40 tons of trees are discarded each year and end up in landfills. Some are sprayed with artificial snow that has environmentally harmful components. Artificial trees now can look completely real and can be used over and over for years to come.

If you print out a stack of informative newssheets to include in your Christmas cards, you should look at getting recycled toner cartridges for use in your printer. These remanufactured toner and ink cartridges save the waste of sending used cartridges to the dumps. Remanufactured and compatible cartridges are excellent ways to save money and the environment at the same time.

Inkjet Superstore.com provides high quality remanufactured and compatible toner and ink cartridges that help save the environment. These great cartridges are carefully manufactured so they meet or exceed the output and quality of the OEM brands. We're happy to contribute to your efforts at "going green."

Chapter 3 HP 51645A Ink Cartridge Review

You'll find the [HP 51645A black ink cartridge](#) is an ideal workhorse inkjet cartridge for printing with reliability and precision. The HP 45 manufacturer's retail price is \$35.99 but you can get discount prices at [Inkjet Superstore.com](#). You'll get great savings but high quality printing at the same time.

You can buy the OEM (Original Equipment Manufacturer) HP 51645A ink cartridges or a remanufactured version. Both give you the impressive print results that you are looking for. The standard page yield of the HP 45 black inkjet cartridge is 600 pages.

Of course, the HP manufacturing company makes the OEM HP 51645A or HP 45. They hold the warranty on the item and stand by its excellence. The cost for the name brand is a little more than the compatible inks, but you are paying for confidence in their name brand and should get quality inkjet cartridges.

The discount [remanufactured HP 51645A inkjet cartridge](#) will also stand up to standard use in your printer. They are ISO-9001 certified cartridges and will not void a warranty on your printer, while effectively matching the quality and output of an OEM ink cartridge. They are a lot cheaper! At [Inkjetsuperstore.com](#) we will also back it with a full one-year money back guarantee. We will stand by our products and take care in their manufacture to be able to give you the best in cheap prices.

The HP 51645A ink cartridge is compatible with StyleWriter 6500, Fax 1220 Series, and many Color Copiers, Deskjets, OfficeJets and Photosmart printers.

Chapter 4 Recycling News...Discover HP Planet Partners

For the past 17 years HP has been servicing millions of customers over 47 countries to return and recycle their printing supplies. To gain some perspective on the impact that has on recycling efforts, HP has collected more than 198 million HP LaserJet and HP ink print cartridges worldwide.

[Inkjet Superstore.com](http://Inkjet.Superstore.com) as an authorized reseller of HP products supports entirely HP and their quest to provide recycling solutions for your toner & ink cartridges as well as for your HP electronic devices.

What you need to do is visit HP's recycling program at www.hp.com/recycle. There you can find a recycling location near you. Staples is the first to pilot HP retail recycling, with more than 1500 U.S. locations you can sure find one near you.

Once you visited the site you'll find recycling services that allow you to easily recycle from computer equipment, to printing supplies, rechargeable batteries and other items.

Some of the things offered are:

- Request a pre-addressed postage paid box that holds from 20 to 300 HP inkjet cartridges.
- In case you need it for large-format cartridges you can ask for a box that holds up to 20.
- Request a postage-paid envelope or print a label
- Recycling by the pallet means that you must have at least 75 LaserJet cartridges or 2,000 inkjet cartridges to recycle.
- Earn PurchasEdge points for recycling.

This is just a quick overview of what HP has prepared in order to be Green all the way. As part of their quest up to date they've recycled one billion cumulative pounds of electronics and HP print cartridges and guess what? They want to double that recovery rate to reach two billion by 2010. Are you going to be part of that?
