

EyeClick Interactive Displays for Children's Museums and Playgrounds

Children will want to come back again and again to learn and play with EyeClick's interactive displays.

- **Engaging games**
Any learning subject can be made fun using the appropriate interactive display
- **Single- or multi-player**
Involve as many children as you like in a wide variety of single- or multi-player games and educational activities
- **Update content and new games as often as you like**
Using standard authoring tools such as Adobe Flash®, Director®, and HTML
- **Perfectly safe**
Since the entire display is made up of a video projection and motion-detecting cameras, there are no moving parts for children to trip on
- **Tamper-proof**
All the display parts are cleverly hidden high above the floor or behind a glass display, making them virtually tamper-proof
- **Flexible installation**
Works on a wide variety of display sizes, shapes, and environments

EyeClick is a world leader in providing technology and creative content for interactive displays used in retail spaces, at exhibitions, and in children's museums. Leading brands across the globe have chosen EyeClick to transform their floors, walls, and window areas into stunning interactive displays.
