

## Location Hub<sup>®</sup>

Now Available Online!

Your business, no matter what its size, can now utilize the power of Location Hub<sup>®</sup> to solve address quality and management issues, for your customers, markets or services, to make more informed business decisions.

Location Hub<sup>®</sup> is a web user interface that delivers software, content and functionality as a subscription based, hosted service. This means DMTI Spatial Inc. (DMTI) hosts all of the services, infrastructure, data and security measures on our end and allows you the freedom of 24/7 access to *Location Hub's* functionality over the Internet. The only thing you need is a login and password; we do the rest.

Utilizing a hosted approach that maximizes DMTI's core capabilities, enables your business to realize:

1. **Quicker Return on Investment (ROI)** – Deploy in minutes, not months, software functionality that leverages DMTI's core spatial intelligence without in-house software or server infrastructure; allowing you to start making better decisions, sooner.
2. **Cost Effectiveness** – Stop managing software and infrastructure that's not yours! It's that simple.
3. **Time Savings** – Get answers when and where you need them. An Internet connection is all you need to simply leverage *Location Hub's* reliable services and rich data content.
4. **Achieve Better Analysis** – Benefit from the latest functionality every time you connect to *Location Hub* with automatic and constant upgrades. Have confidence in your decision making capabilities.
5. **Scalability** – Use as much or as little of *Location Hub* services as you need, and let it grow as your needs grow; performance and functionality are scaled to meet your needs.
6. **Customization** – Integrate *Location Hub* services into your pre-existing applications making it easier to integrate and deploy in your existing workflows.
