

Western New York Radiology Associates Selects Corepoint Integration Engine to Facilitate the Patient Data Flow of Multiple Client Sites

Corepoint Health Enables Radiology Practice to Interface Directly with Multiple PACS, Voice Recognition, and EMR Systems Productively

PLANO, Texas, December 21, 2009 – Western New York Radiology Associates, a large outpatient diagnostic imaging practice in Buffalo, New York, selects [Corepoint Integration Engine](#) to efficiently orchestrate their internal workflows and external patient data flow from multiple client sites.

With an operational focus primarily on providing diagnostic readings for imaging clinics, Corepoint Integration Engine is serving as an essential platform enabling Western New York Radiology Associates to service a greater number of clients more productively.

“With the number of imaging clinics that we provided diagnostic readings for growing, it became apparent that we needed an [interface engine](#) platform we could deploy quickly—ideally plug-and-play—that could easily facilitate a high volume of data exchanges,” said Fred Lombardo, Director of Operations.

“Additionally, the interface engine needed to be flexible enough to manage the multiple data format requirements from the various applications used by referring [imaging clinics](#). Corepoint Integration Engine met all of our criteria with its ability to configure, test and deploy new interfaces rapidly and manage them productively. The overall robust nature of Corepoint Integration Engine provided a level of confidence that was absent with our previous setup.”

Implementing Corepoint Integration Engine has significantly enhanced Western New York Radiology Associates’ IT environment by enabling them to move beyond point-to-point interfaces, eliminate manual data entry steps, and improve the reporting turnaround times for a more efficient workflow.

“Prior to adopting Corepoint Health’s interface engine solution, we operated in a cumbersome, manual environment that included dictation over the phone, which was time intensive and error-prone. This increased the overall cycle times for readings. With Corepoint Integration Engine in place we can now effectively interface directly with PACS, Voice Recognition, and EMR systems,” said Lombardo.

Corepoint Health has provided Western New York Radiology Associates with an enterprise wide integration solution that has completely transformed what was a myriad of complex interfaces into an automated and efficient workflow environment.

“Corepoint Integration Engine has been the jack-of-all-trades, meeting our internal requirements of integrating RIS/PACS/VR applications, and meeting the requirements of our imaging clients. The integration engine runs seamlessly without issue,” said Lombardo.

“We are excited that Corepoint Health has played a contributing role in helping Western NY Radiology Associates transform their workflow. We are proud to be a partner in helping them to accomplish their objectives to deliver the highest quality, efficient diagnostic imaging services to their referring clients,” said Phil Guy, CEO, Corepoint Health.

###

Western New York Radiology Associates:

Western New York Radiology Associates is a large outpatient diagnostic imaging center based in Buffalo, New York. Operating with three centers using multi-modalities, Western NY Radiology Associates provides diagnostic services in High Field Open MRI, High Field Closed MRI, Spiral CT Scan, Ultrasound, Bone Densitometry, and X-Ray.

About Corepoint Health

Corepoint Health solutions deliver interoperability for healthcare organizations and simplify the complexities of healthcare data through practical software applications, consulting and training. Our innovative and proven software solutions leverage clinical data flow efficiently for a diverse group of healthcare entities including hospitals, imaging centers, laboratories, clinics and healthcare vendors. This next generation approach to healthcare data and streamlined workflow is where Corepoint Health specializes in helping customers discover the power of integration. www.corepointhealth.com
