- › Specialty Items

- › Foil, Embossing
- › Rubber Stamps
- › Labels

And Much More!

Our early software development model was unique to the industry, comprised of four critical elements:

- › Thirty years of manufacturing expertise
- › A highly competent development team
- › A network of over 60 production plants to test and implement solutions
- › Over 65,000 retail and commercial customers provided immediate feedback on our technologies

---

Overview >

- › BCT is staffed in North America with a programming and training support team.
- › Our hosting provider, PEER1®, the largest hosting facility in North America, provides 24/7 monitoring of all servers.
- › BCT contracts out with an 800#, live support service, available 24/7 to end users. This service has direct access to our programming & support staff.
- › BCT currently processes and routes approximately 1.5 million orders annually.

- › Approximately 50% of Fortune 1000 companies use technology developed by BCT for print procurement purposes.
- › BCT is a licensed & registered Adobe® Development partner.
- › BCT's technologies are used as punch-outs for various other software solutions, such as ARIBA®, Four51, Quantum®, and by U.S. state procurement offices and other enterprise accounts.
