Drexel University Launches Online Master's in Engineering Technology

The new online MS in Engineering Technology offers courses focused on the technologies used in today's modern emerging industries.

Philadelphia, PA (PRWEB) – December 30, 2009 - [Drexel University Online](#), a leader in online degree programs, has added a new online degree program to its offerings, the [online Master of Science in Engineering Technology](#) from Drexel's Goodwin College.

The online master's in Engineering Technology uses a professional, multi-disciplinary, team and project-oriented approach to graduate education. It focuses primarily on the applied aspects of the technological spectrum closest to product development and improvement, industrial practices, and engineering technology operation functions. It meets the needs of and provides the flexibility for graduate students who want to expand their knowledge through advanced engineering technology courses. It also provides the flexibility for graduate students to expand their knowledge in a specific technical specialty.

Graduates of Drexel's online master's in Engineering Technology are able to successfully apply concepts and skills developed in a variety of technical and professional disciplines including materials properties, energy conversion technologies, green manufacturing, rapid prototyping, quality control, and computer applications and networking to improve production processes and techniques.

"We're very proud to offer our students the outstanding Drexel curriculum within this convenient online format," said Dr. Kenneth Hartman, academic director for Drexel University Online. "All of our online programs, including our master's in Engineering Technology are taught by the same world-renowned faculty as our on-campus courses."

Applications for Drexel's online master's in Engineering Technology are now being accepted for fall 2010. For more information, visit Drexel's [online degree website](#), e-mail info@drexel.com, or call (877) 215-0009.
