

**BOTTLE ROCKET APPS IS PROUD TO ANNOUNCE DOODLE BOMB
FOR IPHONE AND IPOD TOUCH!**

Help your hero earn the title "Bomb Master" by blasting your way through 50 mind-bending missions in this unique physics puzzle game. It will take quick thinking, timing and precision to earn Bomb Badges on each mission and unlock the super-challenging Master Missions.

Think you have what it takes? Stretch out your finger and join the fight today!

MISSION BRIEF:

For millennia philosophers have predicted the rise of a hero who would restore balance to our chaotic world... nobody predicted he would be a Doodle! Blast your way through 50 mind-bending physics puzzles as you guide your hero to the ultimate goal of "Bomb Master". Interact with unique physics driven machines and characters that will help (or hurt) your attempt to infiltrate the enemy base using as few bombs as possible.

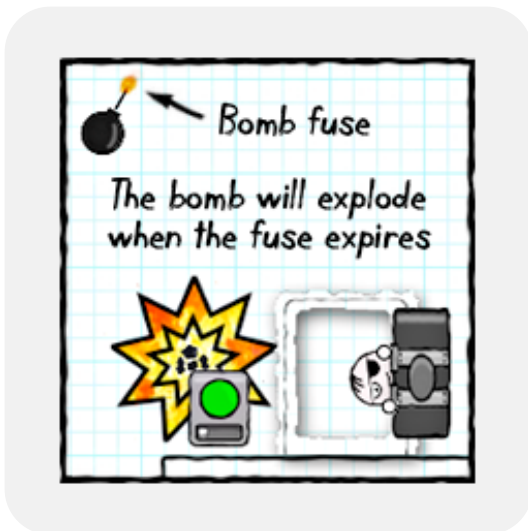

FEATURES:

- 50 action packed missions including 15 super challenging "Master Missions"
- Real physics driven bombs, machines and characters set in a Doodle style world
- Achieving mission Goal requires strategy, timing and precise placement of bombs
- Interact with control panels, water wheels, pipes with valves, trap doors, magnets, moving transports, spinning cannons and more!
- Humorous characters including the "Trigger Happy Soldier" and the "Bomb Bouncing Rat"
- Puzzles start out easy with in-game help... but quickly ramp up in difficulty
- Skip any of the Standard Missions if you get stuck, then come back to them later
- Mission selector to preview and load any of the missions you have unlocked
- Replay missions to earn Bomb Badges that unlock bonus content
- Spam bombs for cool bomb chaining explosion effects
- Accelerometer tilt control of bombs to apply a slight roll on flat surfaces
- Play your iPod music during the game
- Easy to pick up and play

HOW TO PLAY:

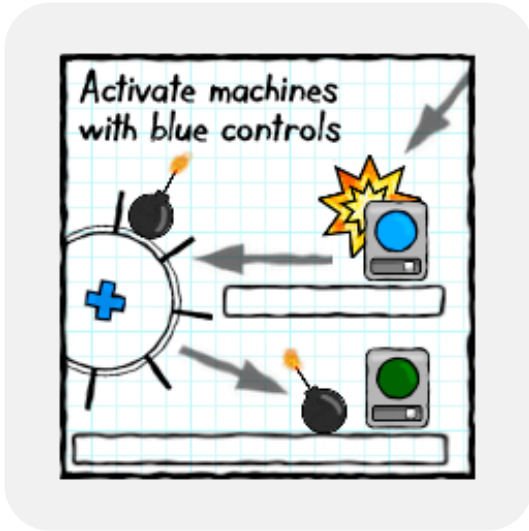

- Tap anywhere on the screen to throw a bomb in that direction
- How far you tap from the Hero determines the force of your throw
- Taps close to the Hero will be softer... taps further from the Hero will throw bombs harder

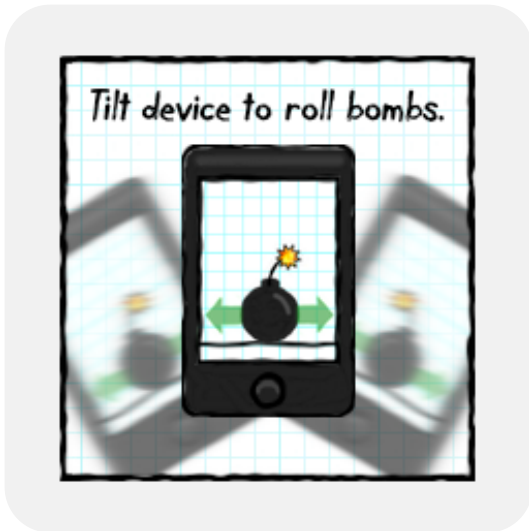

- Bombs will explode when the fuse expires
- Try to unlock the door to the next mission by throwing and exploding a bomb near the green control panel

- Most missions will require you to activate machines that will help you get closer to the green control panel... machines are activated with blue control panels

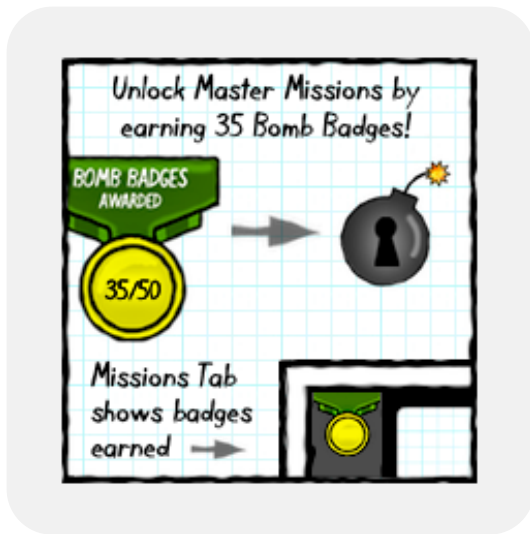

- You can tilt the device to slightly roll the bombs when they are on flat surfaces or flying in the air

- Tap the pause button to skip or retry missions

- Unlock "Master Missions" by getting the Goal score of less for each standard mission
- Win the game by completing all the "Master Missions" (you cannot skip these missions and must get Goal or less to advance)
