## INFRASTRUCTURE PLANNING SERVICES

[profitpt.com/infrastructure](http://profitpt.com/infrastructure)

Profit Point's Supply Chain Design and Infrastructure Planning services help you solve complex manufacturing and distribution footprint and utilization problems. These services help you develop capital investment, product mix and asset utilization strategies that will enable profitable growth in a changing business environment.

All of our supply chain consultants are seasoned veterans that have years of management-level experience solving complex planning needs for Fortune 500 companies across a range of industries for businesses around the globe. We apply that depth of experience and proven optimization techniques to ensure that your supply chain maximizes customer service and profitability.

## NETWORK DESIGN SOFTWARE

[profitpt.com/network](http://profitpt.com/network)

Profit Network<sup>™</sup> optimization tool is a stand-alone planning software package that is used to design the most profitable supply chain distribution network. Profit Network can be used to analyze the placement and location of production facilities, distribution centers, and warehouses over a multi-period planning horizon. Profit Network is used to help firms restructure their supply chains after mergers, periods of rapid growth and in anticipation of geographic or product preference shifts in the market.

PROFIT  
network<sup>™</sup>

Green Network<sup>™</sup> is a stand-alone planning software package that is used to design supply chain distribution networks that must balance profitability and environmental impact. Green Network can be used to measure your operational footprint while you analyze the placement and location of production facilities, distribution centers, and warehouses over a multi-period planning horizon.
