

Regenesys Leadership Exchange

The Regenesys Leadership Exchange is a conversation between leaders in civil society and individuals seeking to learn about leadership. The Regenesys Leadership Exchange platform was created to enable networking and knowledge exchange around dimensions of leadership as a critical enabler of transformation.

Regenesys has for 10 years put forward the proposition that leadership and leadership skills based on spiritual and emotional intelligence will be the key to unleashing potential. This leadership exchange is another innovative concept brought to you by Regenesys – the leading management and leadership school in South Africa.

Seminars will be run in 2010 that focus on catalysing conversation between top business and governmental leaders and interested members of the public and academic communities. The unique feature of this programme is that Regenesys integrates the learning that is created in this way back into the classroom through making seminars, case studies and other materials available to students on an ongoing basis for continual learning. Furthermore the aim of Regenesys is to publish the interviews and articles being created in the process as a book on leadership.

Do not miss this opportunity to:

- See some of the most influential motivational and leadership authorities in South Africa today
- Acquire new leadership knowledge to help you stay ahead of the game
