**IonLoop Introduces New Powerful Negative Ion + Magnet Bracelet**

IONLOOP™

Irving, TX IonLoop has introduced a new Ion + Magnet bracelet that is offered for sale on [www.ionloop.com](http://www.ionloop.com). The company has developed new technology... Ion Regeneration Technology™ to counteract the harmful effects of our modern day environment. Everyone from world-class athletes who compete under the energy-draining UV rays of the sun to office workers who sit in front of computer monitors daily and are exposed to fatigue producing positive ions may equally benefit from this new technology. Cell phones, BlackBerrys, Smart Phones and all other electronic devices give off high levels of positive ions. IonLoop bracelets help your body fight back with one of the highest levels of negative ion content in the industry. The negative ion properties are manufactured into the silicone bands themselves and will not lose their effectiveness over time...IRT™. The bracelets also contain two small powerful magnets that are visible in the "shell" that will offer the user all the natural benefits of magnets. We invite you to visit the Technology page on [www.ionloop.com](http://www.ionloop.com) to learn more.
