

CorasWorks — Applications for SharePoint

Plug-and-Play or Build Your Own

At CorasWorks, it's about the applications. And, more importantly, how applications drive immediate business value on Microsoft SharePoint. More than 1,000 customers and 1 million end users around the world trust and rely on CorasWorks software to drive immediate business value on Microsoft SharePoint. Whether they are downloading and installing our plug-and-play apps or building their own applications using our application development tools, our customers have come to understand that the fastest, easiest and most cost effective way to realize business value on SharePoint is through CorasWorks.

SHAREPOINT APPLICATIONS IN MINUTES... JUST ADD DATA

With CorasWorks, you really can have applications in minutes. The combination of our plug-and-play business apps and our AppEngine for SharePoint can have you up and running with feature-rich applications in less time than it takes to cook a frozen pizza. Choose from a variety of plug-and-play apps from CorasWorks or our Application Publisher Partners. All apps can be downloaded from our online CorasWorks App Store.

Plug-and-Play Business Apps for SharePoint

Plug and Play Apps provide immediate business value for SharePoint. There's no reason to invest time in custom development when you can download our "Ready for Work" certified apps. "Ready-for-Work" means the application is ready to download, install, configure and use. No custom code or dll's required or included.

The AppEngine for SharePoint

The AppEngine for SharePoint, Powered by CorasWorks, is an innovative runtime environment for SharePoint. It is the key enabler for running plug-and-play business apps. The AppEngine also supports custom applications built by organizations themselves or by third-party service providers.

The App Store

The CorasWorks App Store is your one-stop shop for plug-and-play applications for the CorasWorks/SharePoint platform, providing immediate business value. With the App Store, you simply find the apps you need, download them, and then install, configure and use. You can be up and running with the majority of the apps in less than 30 minutes.

Visit the App Store at www.CWAppStore.com and check out a variety of applications including Project Portfolio Management, Help Desk with Self Service, Work Order Approval, Time Off Management, Software License Management, Blog-Style Announcement Service, and more.

With CorasWorks, you really can have applications in minutes. The combination of our plug-and-play business apps and our AppEngine for SharePoint can have you up and running with feature-rich applications in less time than it takes to cook a frozen pizza.

DESIGN BETTER, BUILD FASTER, MANAGE EASIER...ACCOMPLISH MORE

If you're looking to build your own applications, CorasWorks provides application development tools that dramatically reduce the time and effort required to design, build and manage your applications on SharePoint. Our modular application development system transforms the way you use and develop on SharePoint. It introduces many of the benefits of Web 2.0 and Rich Internet Applications to SharePoint and allows you to design, build and manage your applications without the cost and complexity of custom code development.

Workplace Suite – Design, Build, and Manage

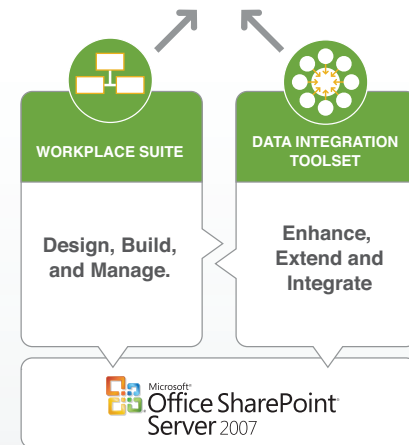

The CorasWorks Workplace Suite enables developers, non-technical “builders” and system administrators to be more productive and efficient by significantly reducing the time to design, build and manage SharePoint work environments and applications. Key features of the Suite include design tools, point-and-click development wizards, rich end user forms, dashboards and displays, and a central management system.

Toolset – Enhance, Extend, & Integrate

The CorasWorks Toolset provides developers, architects, and IT and database administrators with a comprehensive, integrated system to build composite applications on SharePoint without custom code development. With the Toolset you can extend your SharePoint applications, create enterprise mashups, and connect to external data sources. Our open, non-proprietary XML API eliminates the need to code to proprietary interfaces and allows you to integrate with external sources via ADO, XML, http and web services.

Build Your Own APPS

THE CORASWORKS COMMUNITY

CorasWorks Community (<http://community.corasworks.net>) is a free, public community aimed at increasing business value for those deploying CorasWorks on SharePoint. Designed to encourage interaction and sharing among customers, partners, builders, developers and end-users, the CorasWorks Community features forums and blogs, the CorasWorks App Store, and a Resources section where you access videos, white papers, blueprints, how-to guides, and more to increase your understanding of CorasWorks software and applications.
