

VMware Appliances for ECMS Deployments, Easy as 1•2•3

With DCS VMware Appliances, a Enterprise Content Management System can be deployed easy as; 1) acquire ECMS seats; 2) install DCS Appliances; 3) migrate content into repository ready to use.

This '1•2•3' product is similar to the Appliances that DCS has tested and uses to deploy a new hosted customer for development or production in five days or less. Only with this product you get all the advantages of a quick deploy hosted solution but in your environment on your equipment. The package includes test scripts and training 'Quick guide.'

VMware Appliances Available today;

- EMC Documentum and Documentum Compliance Manager 6.5
- EMC Documentum Retention Policy Services 6.5
- NextDocs on MS SharePoint 2007
- MS SharePoint 2007

The preconfigured DCM '1•2•3' product is running in the DCS hosted environment for customer preview.
