

NEWS RELEASE

Coastal Range Systems and ProjectLine Solutions announce affiliation via The Encaptis Group.

Coastal Range Systems and ProjectLine Solutions are pleased to announce that they have entered into an affiliation to provide leading business management solutions in an expanded geography.

FOR IMMEDIATE RELEASE
February 2010

VANCOUVER, BC - Coastal Range Systems and ProjectLine Solutions are pleased to announce that they have entered into an affiliation agreement, resulting in the formation of 'The Encaptis Group'. This will enable both parties to provide enhanced products and services across an expanded geography, using combined resources. The Encaptis Group is an organization of independent providers, offering leading business management software systems that support the advancement of customer goals.

The Encaptis Group will enable its members to immediately deploy their joint resources across Western and Central Canada. Additional geographies are contemplated through the growth of the affiliation. Both Coastal Range and ProjectLine are engaged in the business of providing business management systems for small to mid-sized enterprises. The combined customer base of the two Gold-Certified SAP Partners represents one of the largest in Canada for the SAP® Business One solution.

Derin Hildebrandt serves as Vice President at ProjectLine, where he leads the ERP practice. "The shared values and purpose of the two firms has been a key factor in the decision to form Encaptis. Coastal Range has established themselves as a team with diverse talents and dedication to standards – customers and shareholders alike will benefit from the affiliation," said Hildebrandt.

The Encaptis Group will provide a consistent quality of approved products and services, ensuring that implementation services are based on a refined set of best practices. Leveraging the shared skills and specializations across an expanded geography will minimize project risk and enhance customer retention. "As small to midsized businesses strengthen and expand their operations, they will look to consulting firms that have an established track record. ProjectLine has proven themselves with a high level of customer satisfaction across their installed base, a testament to their commitment to putting the customer first," says Stephen Loyd, President, Coastal Range Systems. "The affiliation will be integral to the growth of member companies over the next several years."
