## Sample Chapter

remain marching and vigorous, the feet being placed in time. The steps cover less ground and are higher than at the trot because all the joints bend more markedly. The collected walk is a medium walk, although showing greater activity.

**trotted walk.** The horse covers as much ground as possible and without losing the regularity of the steps. The hind feet fall clearly in front of the hoof prints of the fore feet. The athlete should stretch out the head and neck (forward and downwards) in contact with the mouth and control of the poll. The nose must be in the vertical.

The walk is a pace in four-beat rhythm with eight phases (numbers in circles indicate the beat).
