

2nd Annual Florida Alliance for Renewable Energy Conference:
Discussing Job Creation, Investments, and Energy Security

Florida's Decade for Renewable Energy

Please Join us...

You have the power to make a substantial difference for the future of Florida!

Orlando, Florida ■ March 26 - 28, 2010
at the
Gaylord Palms Resort & Convention Center
Kissimmee, FL

"...China's not waiting to revamp its economy. Germany's not waiting. India's not waiting. These nations aren't standing still. ...They are making serious investments in clean energy because they want those jobs. ...providing incentives for energy efficiency and clean energy are the right thing to do for our future – because the nation that leads the clean energy economy will be the nation that leads the global economy. And America must be that nation."

— President Barack Obama's 2010 State of the Union Address

Florida is the third largest energy market in the country — we import over 90% of our fuel supply from other states and countries. As President Obama emphasized the need for investing in clean energy infrastructure, it is time we invest Floridian's money back into our economy to develop clean sources of energy naturally available in our state. Attend the 2nd Annual FARE Conference, "Florida's Decade of Renewable Energy", to learn how Performance Based Incentive (PBI) policy will revitalize Florida's economy and what you can do to

promote it. Presenters from the renewable energy (biomass, solar, etc.), real estate, finance, and public offices will demonstrate how this policy will benefit our economy by attracting over \$2 Billion in private investments, creating over 85,000 jobs, and improving our state's tax base. Representatives from Gainesville and Ontario will share with us how the policy has helped stabilize energy prices and keep unemployment low in their regions.
