

Video Conferencing Tables for an Immersive Sensory Experience

Boomerang™ Telepresence Studio

Right back at ya!

Designed for multiple camera, multiple screen telepresence, Boomerang™ sets the stage for an immersive experience. Presentation data is displayed on widescreen monitors or laptops using genuine flipIT® equipment. The backs of monitors or laptops are dressed for the camera, allowing unobstructed camera coverage.

Cables and wiring are out of sight, but easily accessible. Monitor screens or laptops are easily raised for use and put away when not needed.

People sit comfortably, with plenty of leg room. Boomerang™ looks great in the room, and positions people so they look their best on camera: beautifully composed and professionally presented.

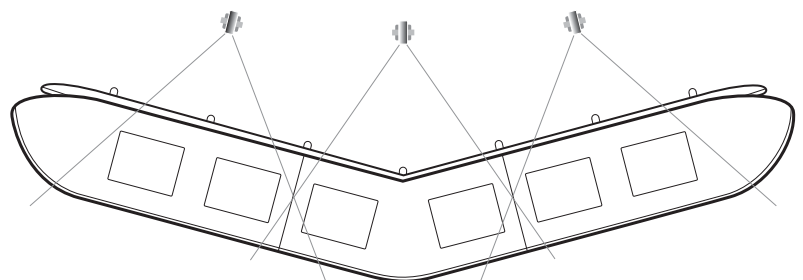

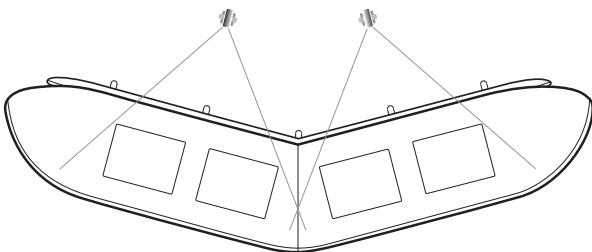

Boomerang Studio4™

Sonata Thermofoil
4 flipIT® Stations: FIL18/FIL23/FIH19/FIH23
