

Longest Range Cordless Telephone Systems

Health Care & Assisted Living Facilities

Set Your Facility Apart From the Rest with Advanced Communication.

The longest range cordless phone system, EnGenius DuraFon Series, will provide mobility to staff members providing the best possible care.

With seamless communication from making and taking outside calls, to instant intercom ability to specific staff members, will allow care givers to be more attentive and responsive to patients and residents.

Family members of patients and residents may choose one care facility over another because of its ability to provide closer and more attentive care to their loved ones.

The EnGenius DuraFon cordless phone system allows staff to be anywhere in a facility and get instant communication of a residents or patients needs and respond immediately.

Taking advantage of this available technology, will not only provide better care, but with the improved staff efficiency, greater profitability.

For more information and applications contact your local authorized dealer.
