

Fleet Operations Management Solutions

Taking your fleet to a whole new level.

Software solutions meeting the needs of today's fleets.

HELPING YOU MEET YOUR GOALS

Rising costs, tight regulations, and shrinking budgets are all playing a roll in how a modern fleet runs their operation. Fleet managers need a comprehensive, usable system that helps them manage and make strategic decisions at a fleet-wide level.

Led by a vision to be the "data hub" of a fleet operation, Collective Data has helped government & municipal, construction, utility, telecom, and various private industry fleets implement a system that helps push their level of efficiency and productivity to a whole new level.

POWER THROUGH FLEXIBILITY

Every fleet is different. Designed to be customizable and modular, Collective Data is able to mold the software to the specific requirements of any fleet. Customizations are able to be completed quickly, and at a fraction of the cost typically associated with the software industry.

- Custom report engine support
- Organizational hierarchy changes
- Change label names to match your organization's terms
- Add user-defined fields for additional tracking
- 3rd party integrations, custom import scripts, additional calculations
- Much more

"Our use of Collective Data's software has certainly made our organization more efficient. I can easily coordinate the efforts of our shop to keep all the preventative maintenance work up to date."

- **John Hobler**, Fleet Manager, Hampton Newport News Community Services Board

A HOST OF BENEFITS

- Extend the life of vehicles and equipment
- Identify & manage over/under utilized vehicles
- Control spending and meet cost expectations
- Reduce unnecessary inventory
- Improve productivity
- Ensure regulatory compliance
- Reduce equipment downtime
- Identify and reduce fleet-wide costs
- Increase warranty recovery
- Budget management
- Validate and track "going green" movements
- Superior support services
- Powerful reporting
- Much more

"Collective Data has provided so much flexibility for us. Our transportation company provides vans, buses, cabs and limos and all require different types of information for proper care and decision making. We have found very practical options with their program that have allowed for very valuable insight on our fleet, in a very user friendly way."

- **Ciro Ayala**, Maintenance Manager, Tectrans Inc.

Tools for managing your fleet operation.

Each organization has the ability to track and report on whatever aspect of the software they need, when they need it.

Through flexible security options, your software can be setup for various users. Keep things simple for mechanics, parts workers, or drivers.

Give fleet managers complete access to the wide-array of operations management tools at their disposal. The choice is up to you and your organization.

“As a Regional Service Provider for DISH Network, we rely on outside companies for the actual maintenance work on our trucks. Collective Data has been very beneficial for us to stay on top of scheduling and logging all the maintenance work done for each of our 80+ vehicles. The software allows our company to more efficiently track our vehicle maintenance and repair work.”

- **Leisl Sizemore**, Fleet Manager, Star West Satellite
