Leaders from kitchen to customer
With ideas from real world users like you

Food Service Division

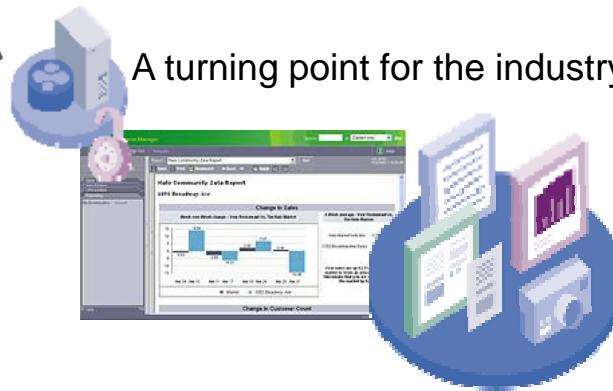

DCS a solution for business success

Existing Hosting Partners

DCS hosted offerings

A turning point for the industry

Better Technology
with
Input from Business Users

Customer Input

Today's Situation

- ▶ Costly changes to old or custom PoS systems from vendors to draw new customers
- ▶ Lack of visibility across multiple stores, regions or brands
- ▶ Spartan features and reporting
- ▶ Lack of options to automate and support supply chain, security or training

DCS's Software as a Solutions (SaaS)

- ✓ Fully hosted yet supports offline transactions when web connection is not available
- ✓ Online menu/ordering options
- ✓ Real-time integrations to Quickbooks
- ✓ Fully PCI compliant transactions

DCS Solution includes

Secure web based central solution that meets the need of your restaurant type

- ✓ Track employee performance,
- ✓ Track sales performance at location, track individual menu items,
- ✓ Have Remote access, anytime, anywhere &
- ✓ Monitor employee activity and sales and promotions

DCS will help you, the Franchisee free up time to do what's important, increase revenue and profitability.

Strong technology with real people supplying input to the design

DCS Hosting enables you to;

- ✓ measure your change in net revenues
- ✓ customer counts, and
- ✓ menu prices

If you have multiple locations DCS lets your managers compare where their restaurant stands in the entire Community of users for any given date range. The information is calculated automatically and delivered to you on-demand via the Web.

Hosting saves you money and lets you focus on your customers

- ▶ **50 – 80% less than traditional POS** – DCS reduces the cost of “enterprise management” substantially since all the franchise data resides in one location.
- ▶ **Centralized Support** – Through our centralized support and training center we can train our staff and maintain consistent processes in one place. In comparison, the traditional POS vendors struggle to maintain consistent training and support protocols in place due to their reseller/local support business model.
- ▶ **Customer satisfaction** – DCS can provide you the tools to understand what your customers think of your food, staff and environment at each of your restaurants
