

OcuDerma Testimonials

"I recommend OcuDerma to patients on a daily basis for helping to keep the skin around the eyes healthy. It is especially appropriate for contact lens wearers because OcuDerma is formulated as a non-oily gel that, even if it does creep into the eyes, will not cloud their contacts."

~ Kathryn R., Optometrist, Chesterfield, MO

"I have been using OcuDerma for over six years. Not only does it help reduce the appearance of fine lines and wrinkles, it really keeps the skin around my eyes supple and soft - thank you"

~ Rosann B., Pittsburgh, PA

"OcuDerma is really amazing. I used to use 2 or 3 different high priced department store products for eye treatment. Once I started using OcuDerma, not only did I get better results - I saved a lot of money"

~ Lynette H., Union, KY

"My experience has been excellent. I began using OcuDerma to help with the dark circles around my eyes and I can see a noticeable reduction in their appearance."

~ John P., Zellenople, PA

"My eye doctor recommended OcuDerma to me a few years ago and I have been using it routinely ever since. I really like that it is not greasy like some creams, and, following application, I can easily put make-up right on top."

~ Helen H., Rancho Santa Fe, CA

This is the best product for care of the skin around the eyes. I have everyone in my family using it. Thank you."

~ Dawnia A., Milwaukee, WI

I could notice an improvement in the overall appearance of the skin around my eyes within six weeks of using OcuDerma. It also was very gentle on my extremely sensitive skin - great product!"

~ Debbie C., Ft. Lauderdale, FL

Since we placed OcuDerma in our optical dispensary, patients not only make initial purchases but repurchase rates are amazing - patients love the product and tell friends and family - we have actually seen new patients visits as a result of OcuDerma purchase referrals.

~ Lee N., Ophthalmologist, Carlsbad, CA

What can you do for the
skin around the eyes?

Introducing

OcuDerma[®]

Ocular Skin Therapy

The Most Complete Skincare Product
for the Area around the Eyes

 **MediNiche**

ADVANCED TECHNOLOGY FORMULA

- ⦿ **Alpha Hydroxy Acids** in a natural, mild exfoliating complex accelerate dead skin removal and smooth fine lines.
- ⦿ **Vitamins** such as the antioxidants A, C, E, & beta-Carotene to protect the skin against free radical damage and environmental attack and, combined with vitamin D and B-complex, help nourish and soften the skin.
- ⦿ **Herbal extracts** like chamomile, corn flower and bisabolol to decrease the appearance of dark shadows, circles, redness and improve overall skin health.
- ⦿ **Moisturizers** consisting of natural liposomes that carry moisture to the lower layers of the skin and sodium hyaluronate which allows skin to hold that moisture.
- ⦿ **Pharmaceutical grade ingredients** are utilized to ensure a quality manufactured product.

MOST COMPLETE, MULTI-ACTION OCULAR SKINCARE

- ⦿ **Refirming Action** - Helps minimize the appearance of fine lines, tightens and tones the skin.
- ⦿ **Diminishing Action** - Helps decrease the appearance of dark shadows and circles.
- ⦿ **Depuffing Action** - Reduces puffiness and revives tired, fatigued eyes.
- ⦿ **Protecting Action** - Guards against free radical damage; natural UV defense
- ⦿ **Hydrating Action** - Supplies immediate moisture deep into skin.
- ⦿ **ALL IN ONE PRODUCT!**

OcuDerma® is uniquely formulated for the delicate skin around the eyes.

Why is ocular skin different?

The skin around the eyes is extremely thin, fragile, and sensitive. The first signs of aging begin here. Continuous facial expressions, fatigue, stress and environmental factors concentrate damaging effects on the skin in the eye area. Because there are few oil glands on the skin around the eyes to provide natural protection, it is a vulnerable area.

What can you do to keep ocular skin healthy?

Get enough sleep, exercise, drink plenty of water, eat healthy and use OcuDerma, ocular skin therapy, twice a day.

Why OcuDerma?

Unlike other products for the skin, OcuDerma was formulated by eye doctors specifically for their patients. It contains the ingredients you need and does not have the ingredients that could be harmful to you...making it ideal for even the most sensitive skin.

The OcuDerma formula has mild alpha hydroxy acids to exfoliate (remove) dead skin, herbal extracts to reduce puffiness, redness, the appearance of circles and shadows and tone the skin, vitamins and antioxidants to soften, nourish and protect the skin from free radical damage, a natural UV protector and the best moisturizing technology available. OcuDerma eye gel is also fragrance-free, contains no artificial dyes, sensitizers or pore clogging agents.

And because OcuDerma is the "most complete" skin care product for the eyes, it will cost you less over the long term. No need to

purchase multiple products to maintain total care of the skin around the eyes - OcuDerma does it all!

How is OcuDerma supplied and how do you use it?

OcuDerma is available in a box containing a 0.5 oz. white, plastic tube. The tube helps to minimize the chance of contamination by eliminating the need to dip fingers into a jar.

OcuDerma should be administered twice daily; in the morning and evening after cleansing, using fingertips to place small dots around the eye area (note: applying out on the orbital bone is preferred because OcuDerma will "creep" inwards toward the lids). Pat gently into the skin and allow one (1) minute for complete absorption. OcuDerma can also be applied around the lips. It can be used alone or under make-up.

NOTE: OCUDERMA IS NOT FOR USE IN THE EYE.
