MIL-Comply MSL

Software for Military Shipping Labels

MIL-Comply MSL makes printing military shipping labels (MSLs) for U.S. Department of Defense shipments fast and easy … *and free*. Using Mil-Pac Technology's premier software, you can now print labels which are fully Mil-Std 129P Change Notice 4 compliant to any standard windows printer. **MIL-Comply MSL** offers:

- On screen wizards to simplify data entry
- Drop-down lists & address database to reduce keystrokes
- Shared data between multiple users
- Context-sensitive help and integrated technical support

Mil-Pac is providing this complete software application free of charge to introduce themselves to DOD suppliers. Software users have no obligation and can use the software on as many PCs and for as long as they desire.

> *MIL-Comply MSL took seconds to install and within a couple of minutes I was printing MSLs for a shipment on my dock. The drop-down lists and ability to pull addresses from a database make label printing fast and easy.*
>
> *- Jason S., Reston VA*

MIL-Comply MSL labels are DOD compliant and print on any standard Windows printer.

With **MIL-Comply MSL**, shipments are always compliant with the latest revision of the DOD specifications. Software users are notified via email when changes to Mil-Std 129 require label changes. Software updates take just a minute and require only a simple download from the Mil-Pac Technology website.

MIL-Comply MSL is part of a comprehensive software suite built specifically for Department of Defense suppliers. Other software features are available for purchase, including modules to assist with:

- RFID printing and automated submission to WAWF,
- UID compliance, including submission to WAWF and UID container labeling,
- Automated WAWF submissions such as Receiving Reports, Combo, Invoices, and more,
- Container Labeling, including over 50 label formats.

FEATURES & FUNCTION

MIL-Comply MSL is a basic labeling solution providing complete MSL compliance. The science behind the software enables many time saving features and the elimination of redundant data entry. Some features include:

- Pre-filling address and Mark-For fields with saved data
- Lookup lists for Unit of Issue and Method of Shipment
- Data format error checking
- DLA and Direct Vendor Delivery full support
- TCN, Required Delivery Date, and Cubes Wizards
- Support for single line item or multi-pack shipments

Minimum Requirements:
- Windows XP, Vista, or Windows 7
- Any PC hardware that meets Microsoft's minimum requirements for the installed operating system.
- Any standard Windows printer, including most thermal transfer printers in Windows print mode.

ABOUT MIL-PAC TECHNOLOGY

Mil-Pac Technology works to make compliance easy by understanding and meeting the needs of defense suppliers, and committing ourselves to total customer support.

Mil-Pac develops products that automate Wide Area Workflow transactions, print DOD-required forms, automate label printing (including full support for RFID), and provide full support for UID compliance.

Customers continue to choose Mil-Pac products to solve their WAWF, RFID and UID needs based on ease of use and positive impact on productivity.

Mil-Pac solutions provide defense suppliers with the ability to:

- Submit data to WAWF automatically – no more WAWF time outs
- Reduce time for shipment preparation
- Improve productivity through data integration – same data entered once, not multiple times

Our offering encompasses a number of powerful, flexible software solutions currently in use by a wide range of defense contractors – from the smallest subcontractors to the largest prime contractors.
